TKC 12/21/95

DOE F 1325.8 (3-90)

United States Government | Department of Energy

memorandum

DATE: DEC 12 1995

REPLY TO ATTN OF: (DP-13, J. Leeman)

SUBJECT: Key Decision Zero, Authorization to Complete a Conceptual Design Report, for the Surveillance Wells Installation Project at the Los Alamos National Laboratory

TO: L. Kirkman, Manager, Los Alamos Area Office
J. Themelis, Director, PMD/Albuquerque Operations Office

The Office of Research, Development, and Testing Facilities (DP-13) has approved Key Decision Zero for the Surveillance Wells Installation Project at the Los Alamos National Laboratory (LANL), and you are authorized to proceed with the completion of the Conceptual Design Report (CDR). The CDR needs to be initiated so that the Defense Programs (DP) and Environmental Restoration and Waste Management (EM) organizations can submit the Surveillance Wells Installation as a multi-program Fiscal Year 1999 Line Item Project(s). We anticipate that the CDR, currently estimated at $350K, will be funded out of indirect funds as this project will address multi-program issues on a LANL sitewide basis. The CDR will be reviewed and authorized by both EM and DP to ensure that the scope of the effort is appropriate to meet the requirements of the Groundwater Protection Management Program at LANL. As the CDR is developed, the Headquarters Program Offices (DP and EM), the Albuquerque Operations Office, the Los Alamos Area Office, and the Laboratory will continue to work together to further define this effort and determine the best approach to ensure that appropriate management and funding support is provided.

HSLA LANL GW 6/M/5/95 Submittal: Monitoring Well Installation Project Conceptual Design Plan
