

MEMORANDUM

To : Peter H. Pache

From: C. Kelley Crossman

Date: September 11, 1986

Subject: Rin-Chem TSDF Permit Application

The Rin-Chem permit application was received by Haz Waste on Aug 5, 1986.

Completeness review suspense is October 24, 1986.

Permit writer is Bill Kopp.

Proposed facility is at 6133 Edith, NW. This is South of Osuna, West of I-25.

EXPEDITED SCHEDULE

Oct, 86    Completeness Review completed

Nov        NOD out

Dec        NOD response

Jan, 87    Application deemed complete

April      Technical review complete

May        Draft permit complete

June       Public notices out

Aug        Redraft permit and respond to comments

Oct        Permit issued

ASSUMPTIONS

Little hostile opposition, forcing recycle through the public notice again.

Priority given to this permit

Rin-Chem is capable of giving fast response to requests for technical input.

MAJOR CONCERN

Traffic on Edith. Edith is not a good road, possibly not acceptable to safely handle the truck traffic. I would like to see four lane roads with left and right turn turnout lanes adequate to handle a large truck on both Edith and Osuna.
