L A NOTEBOOK

This book is a classified document for which you are responsible. Its purpose is not only to assist you in keeping accurate records of technical work, calculations, experiences, trips, etc., but also to provide the United States Government with a means to review our work while in progress and upon completion, and if necessary, to prove in court that work was done on definite dates in order to sustain patents taken out on this work.

THE FOLLOWING OUTLINED PROCEDURE IS RECOMMENDED IN USING THIS BOOK:

1. Record all experimental work, calculations, sketches and the like DIRECTLY in this book.
2. Make successive entries on consecutive pages.
3. Do not start a new page unless the last used page is full or has been marked in a manner to prevent additional entries thereon.
4. Date and sign each page of the notebook at the close of each day.
5. Have the record of the work or ideas witnessed and dated, preferably by one who has observed and understood the actual experimental work recorded.
6. Do not make changes, erasures, interlineations or additions after entry has been dated and signed or witnessed. Make corrections in a new entry and refer back.
7. Record everything rather than too little.
8. Do not remove any pages.

Return this book to the DOCUMENT ROOM when it is no longer needed in your work here.

This book is an official record for which you are responsible. Its purpose is to assist you in keeping an accurate record of technical work, calculations, experiments, ideas, etc., and to provide the United States Government with a means of reviewing our work, both while it is in progress and when it is completed, and, if necessary, to prove in court that work was done on definite dates in order to support applications for patents, or to defend patents issued, as a result of our work.

IT IS RECOMMENDED THAT THE PROCEDURE OUTLINED BELOW BE FOLLOWED WHEN USING THIS BOOK:

1. Record all experimental work, calculations, sketches, and the like DIRECTLY in this book.
2. Make successive entries on consecutive pages.
3. Do not start a new page until the previous one is full or has been so marked that no additional entries can be made on it.
4. At the end of each day sign and date the material you have entered in the book on that day.
5. Have the entries in the book witnessed and dated, preferably by someone who has observed and understood the actual work recorded.
6. After an entry has been signed and dated, DO NOT make any changes, interlineations, deletions, or additions. Make a new entry for corrections and refer back to the original entry.
7. Do not erase or blot out any entry at any time. Before an entry has been signed and dated, changes may be made but care must be taken not to obliterate what was written originally: simply indicate any deletion by a single line through the material to be deleted.
8. Record everything—better too much than too little.
9. Do not remove any pages from this book.

It is the responsibility of the one using this book to see that it is marked with the correct classification and properly safeguarded as soon as a classified entry is made in it.

Return this book to the REPORT LIBRARY when you no longer need it in your work here.

On this date and above location, Z in Road maintenance personnele (see next page for names, etc.) covered boxes which were deposited in dump by security on 12-18/56. This work was done with bulldozer which was started at approximately 3:15 P.M. and was finished about 4:35 P.M. The work comprised of pushing dirt from top South wall down into dump and pushing it to north side of dump to cover the afore mentioned boxes. The boxes were covered with approximately 4" of dirt.

L A NOTEBOOK 9293

JAN 6 1958

This book is an official record for which you are responsible. Its purpose is to assist you in keeping an accurate record of technical work, calculations, experiments, ideas, etc., and to provide the United States Government with a means of reviewing our work, both while it is in progress and when it is completed, and, if necessary, to prove in court that work was done on definite dates in order to support applications for patents, or to defend patents issued, as a result of our work.

IT IS RECOMMENDED THAT THE PROCEDURE OUTLINED BELOW BE FOLLOWED WHEN USING THIS BOOK:

1. Record all experimental work, calculations, sketches, and the like DIRECTLY in this book.
2. Make successive entries on consecutive pages.
3. Do not start a new page until the previous one is full or has been so marked that no additional entries can be made on it.
4. At the end of each day sign and date the material you have entered in the book on that day.
5. Have the entries in the book witnessed and dated, preferably by someone who has observed and understood the actual work recorded.
6. After an entry has been signed and dated, DO NOT make any changes, interlineations, deletions, or additions. Make a new entry for corrections and refer back to the original entry.
7. Do not erase or blot out any entry at any time. Before an entry has been signed and dated, changes may be made but care must be taken not to obliterate what was written originally: simply indicate any deletion by a single line through the material to be deleted.
8. Record everything—better too much than too little.
9. Do not remove any pages from this book.

It is the responsibility of the one using this book to see that it is marked with the correct classification and properly safeguarded as soon as a classified entry is made in it.

Return this book to the REPORT LIBRARY when you no longer need it in your work here.

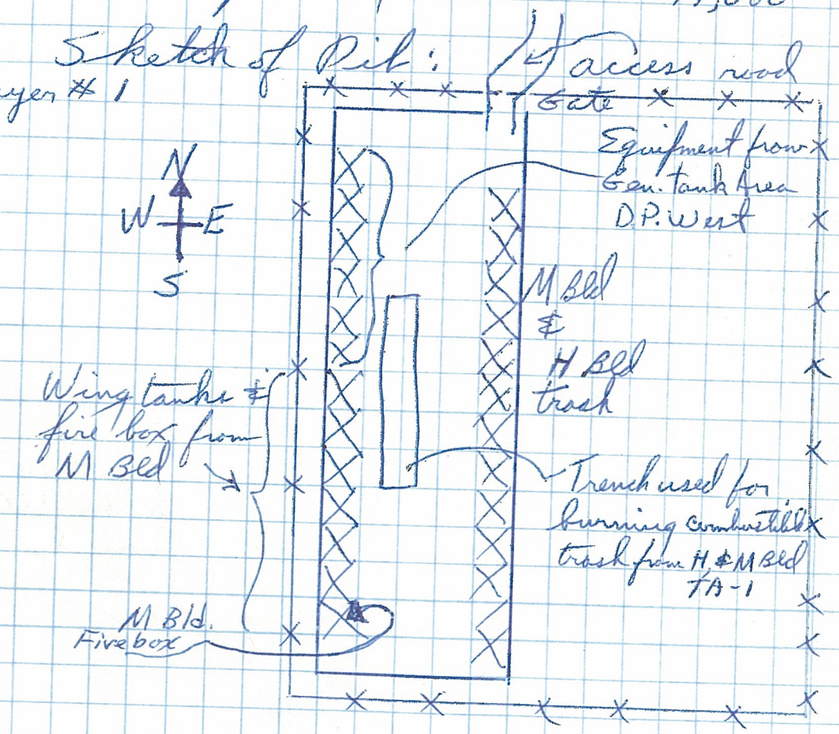
Log book for disposal of Contaminated trash into Pit #one, Area "G" (Mesita del Buey Area). This pit is located on LASL Eng. Dept. Dwg. # Eng-C-18462 & C-18463.

Pit #1 was dug in 1957 (March) on Work order request #57-3-2 & LASL Work order #573248.

Estimated cost for digging pit	$36,558.00
" " " Labor & material	8,662.00
" Cubic yards excavated	44,000

Sketch of Pit:

Layer #1



In spring of 1957, H Bld., TA-1 was torn down. Burnable portions were burned in the slit trench dug in the center of the pit. Unburnable portions were placed against the East Wall in a section about 25 feet wide and 150 ft long.

In the Fall of 1957, M Bld was torn down and portions of it were also burned in the trench

The remainder of the Bld was dumped on top and about 75 feet North of the H Bld trash.

In December, 1957 about 30 wg. tanks from Kirtland AF Base were placed along the West wall as was the firebox from M Bldg.

During the 1st week of January, 1958, numerous piece of equipment from the Gen. Tank Area, D.P. West were placed along the West wall, North of the Wing Tanks.

L A NOTEBOOK 11363

5-3-61

Form 121R—2M—4-58

This book is an official record for which you are responsible. Its purpose is to assist you in keeping accurate record of technical work, calculations, experiments, viewing our work, both while it is in progress and when it is completed, and, ideas, etc., and to provide the United States Government with a means of re- if necessary, to prove in court that work was done on definite dates in order to support applications for patents, or to defend patents issued, as a result of our work.

IT IS RECOMMENDED THAT THE PROCEDURE OUTLINED BELOW BE FOLLOWED WHEN USING THIS BOOK:

1. Record all experimental work, calculations, sketches, and the like DIRECTLY in this book.
2. Make successive entries on consecutive pages.
3. Do not start a new page until the previous one is full or has been so marked that no additional entries can be made on it.
4. At the end of each day sign and date the material you have entered in the book on that day.
5. Have the entries in the book witnessed and dated, preferably by someone who has observed and understood the actual work recorded.
6. After an entry has been signed and dated, DO NOT make any changes, interlineations, deletions, or additions. Make a new entry for corrections and refer back to the original entry.
7. Do not erase or blot out any entry at any time. Before an entry has been signed and dated, changes may be made but care must be taken not to obliterate what was written originally: simply indicate any deletion by a single line through the material to be deleted.
8. Record everything—better too much than too little.
9. Do not remove any pages from this book.

It is the responsibility of the one using this book to see that it is marked with the correct classification and properly safeguarded as soon as a classified entry is made in it.

Return this book to the REPORT LIBRARY when you no longer need it in your work here.

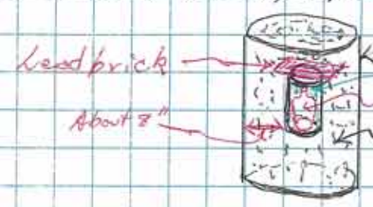
Glass bottles containing U^{235} and fission products were placed in polyethylene jars with vermiculite packed around each bottle. The jars (with lids weighted by lead brick) were set in a metal can which had been set in cement inside 55 gal. drums. Drums to be completely filled with cement on 10/18/62 & lids fastened on.



63 drums were used to hold glass bottles & 7 drums used to hold T^2 waste.

The material placed in these drums originated from J-11 Group. It was transferred to ADPSF on receipt #'s:

63 glass bottles = total number placed in above drums.

Disposal of J-11 (Kiwi fuel element soln.) material in disposal wells:
The operation started with placement of cement into wells #75, 76, 77 & 78, on 10/19. ADPSF delivered 20, 2 liter plastic jars fro la. on 10/22. 5 bottles were placed in each well. Bottles were weighted with lead so as to not "float" when cement is poured over them.
