Dear Mr. Bearzi,

I appreciate your notification that the Los Alamos National Laboratory Installation Work Plan Schedule of Environmental Restoration is being updated. However, you provide no information on what is being done or how it is being revised.

Since that makes it impossible for me to comment, I would simply like to go on record as being adamently opposed to the dumping and storage of radioactive materials at LANL, in the Jemez Mtns, or anywhere in NM where public health is at risk. For way too long "national security" has been interpreted as a rationale for endangering the health and well-being of the human beings who live in this state — not to mention other living beings and the environment.

(over)

Please do your job and protect the people of this state, not the U.S. government, the military, and the corporations who profit from their contracts with LANL.

Very truly yours,

Jerilyn Bowen
