RE: Revision of Permit to Include Newly Listed Waste Codes

Dear Dr. Gordon,

Rinchem Company, Inc. would like to begin the process necessary to revise its Hazardous Waste Facility permit. This would include adding all the newly listed toxicity characteristic constituents, including those with new regulatory levels. I have enclosed a list of these constituents. Please advise me of any other information needed to complete this revision at your earliest convenience. It is my understanding this is a level A revision, as shown in 40 CFR 270.42 (3),(4)

If you have any questions, please feel free to contact me or Lise Gorgone at our Albuquerque facility.

WE CARE,

James H. Moore, Jr.

D043	Vinyl Chloride	0.2	Volatile

- 1 If o,m and p-cresol concentrations can not be differentiated, the total cresol (D026) concentration is used. The regulatory level for total cresol is 200 mg/l.
- 2 Quantitation limit is greater than the calculated regulatory level. The quantitation limit therefore becomes the regulatory level.
