RECEIVED
HAZARDOUS WASTE
PROGRAM

TA-54

Mr. Dinwiddie,

Regarding the closure plan for MDA-P and TA-16 information you sent me. Given the recent information on the increasing contamination of our aquifers by radioactive contamination from LANL I urge you to immediately start a shut down and removal of all nuclear activities, storage and transportation at LANL. Will you be the one remembered in the future for failing to act in the public's interest?

Sincerely,
Bob Anderson
