Re: LANL Facility Order

Dear James Bearzi,

Remediation at LANL might consider comparisons among the results* for various technical areas, their individual disposal procedures (only if records of compounds/elements, quantities + mode of disposal [e.g., diluted] are complete) and disposal environments.
This might facilitate cleanup by noting where contamination has been less due to procedural, environmental or other factors.

Sincerely, James Bayer

* per Order (§ 74-4-10.1 + 74-4-13, NMHWA)
