COMMENT AND QUESTION CARD

DO NOT HOLD ON TO ANY FALLACY THAT SAYS YOUR PHYSICAL WORK IS SEPARATE FROM SPIRITUAL WORK AND RESULTS. YOU HAVE A CRUCIAL RESPONSIBILITY IN THE REALM OF VIOLENCE AND PEACE. PLEASE CHOOSE PEACE, SPIRITUAL DEVELOPMENT, NONVIOLENCE, NONTOXIC RESULTS AND ENVIRONMENTAL JUSTICE.

IF PEOPLE NEED MORE EXPLOSIONS IN THE FUTURE TO "TREAT" SUCH WASTES, ALWAYS ASK "HOW DID WE GET INTO THIS SITUATION?" AND THEN FOLLOW-THROUGH WITH YOUR CONSCIENCE BY HELPING TO STOP THE CREATION OF THE WASTE. EXPERTS IN WASTE TREATMENT, AND REGULATORS OF ENVIRONMENTAL POLLUTERS (BOTH PROFESSIONAL GROUPS) HAVE KEY ROLES IN TAKING ACTION TO PROTECT FUTURE GENERATIONS FROM TOXIC BURDENS. THE BIGGEST ROLE IS TO PREVENT MORE WASTE FROM BEING CREATED, THEREBY NO TREATMENT WILL BE NEEDED EVENTUALLY - WHEN THERE'S NO MORE WASTE.

COMMENT AND QUESTION CARD

Please note that slide 31 completes slide 15: it would be instructive to have a single slide that shows the range of components.

I would like clarification of the justification for setting the upper limit at 15,000 lbs. What other options are there - that were found not viable, ie permit exception granted when circumstances dictate it?

There is too much ambiguity in the phrase "cost-efficient + safe" - #10 An expansion of the study of the alternatives is essential, with costs divided from "safety" (an ambiguous term in itself - workers, residents, air, animals etc) - This is the central argument of the whole permit modification request.
