Dear Mr. Moore,

This is to notify you that the New Mexico Environment Department has approved your request for a Class I modification to your operating permit (number NMD002208627). This modification allows you to store additional waste codes as listed in your formal submission of a revised Part A, dated February 21, 1992. These waste codes represent the D-listed wastes known as TCLP wastes. Attachment G of your operating permit has been amended to add these listed wastes, and the modified Part A has been added to Permit Attachment I.

Please note that according to NMHWMR-6, 270.42(a)(1)(ii), you must within 90 days of receipt of this approval notify all parties on your facility mailing list (this list has been acquired by your staff). Evidence that this requirement has been met must be provided to the Hazardous and Radioactive Materials Bureau.

The New Mexico Hazardous Waste Fee Regulations (EIB/HWFR-1) assess a fee of \$1,000.00 to minor modifications. This fee is due within 30 days of receipt of this letter approving your permit modification. Please make your check payable to:
