Subject: conference call Re. TA-16 closure

Discussion: May 13 soil removal deadline

12 samples at bottom of pond 29 ppb tetrachloroethylene
16 ppb duplicate.

in one sample does this trigger soil removal

#12 is 29 ppb significant one out of 12 samples

will be taking lab results

how much documented no memo required

will removal be at that one sample or total bottom of surface impoundment

need decision soon to meet May 13 deadline

Conclusions or Agreements: Can we meet to discuss this if ~~so~~ I have further concerns also want to meet on closure plans at LANL in general.

Distribution
