Revision No.:

COMPANY - WIDE NONCONFORMANCE REPORT

Mo.Day Yr. 11-MAY-05	**Division:** Federal	**Quality Criteria:** Specifications	**Type:** Process
Instrument Type: ICP	**Test / Method:** SW846 3050B/6010B	**Matrix Type:** Solid	**Client Code:** LANL
Batch ID: 423071	**Sample Numbers:** See Below		

Potentially affected work order(s)(SDG): 135806(3193S)

Application Issues:

Failed Recovery for LCS/MS/PS

Failed RPD for LCS/LCSD, MS/MSD, or PS/PSD

Failed RPD for DUP

Specification and Requirements Nonconformance Description:	**NRG Disposition:**
1. Failed Recovery for LCS/MS/PS: QC 1200840499MS 2. Failed RPD for DUP: QC 1200840498DUP 3. Failed RPD for LCS/LCSD, MS/MSD, or PS/PSD: QC 1200840500MSD	1. The matrix spike and matrix spike duplicate recovery failed for potassium,barium,calcium,magnesium and manganese due to possible matrix interference. The RPD failed on duplicate and matrix spike duplicate for chromium,cobalt,copper,iron,lead and manganese due to sample not homogeneous. Sample #135806001 is a brown grainy soil. Data are qualified and reported.

RADIOLOGICAL SCREENING DATA RELEASE FORM

The following samples (list samples by number) were received at the Field Support Facility (FSF) without radiological screening data. These samples will not be shipped until radiological screening documentation arrives at the FSF. I understand that it is my responsibility to ensure that this information arrives at the FSF in a timely manner. **If holding times are missed because screening data do not arrive, I will pick up the samples when called to do so.**

****

The following samples (list samples by number) do not require radiological screening for the reason stated.

GW05-03- 51063 thru 51066
" " 51083 and 51084
" " 51089 thru 51092

Reason:

No rad activity anticipated in the permeable reactive barrier points

The following Analytical Methods were performed

Method	Description
1	EPA 905.0 Modified

Notes:
TPU is calculated at the 67% confidence level (1-sigma).
The Qualifiers in this report are defined as follows :

JAW 9/2/03

< Result is less than amount reported.
> Result is greater than amount reported.
B Target analyte was detected in the sample as well as the associated blank.
BD Flag for results below the MDC or a flag for low tracer recovery.
E Concentration of the target analyte exceeds the instrument calibration range.
H Analytical holding time exceeded.
J Indicates an estimated value. The result was greater than the detection limit, but less than the reporting limit.
P The response between the confirmation column and the primary column is >40%D.
U Indicates the target analyte was analyzed for but not detected above the detection limit.
UI Uncertain identification for gamma spectroscopy.
X Lab-specific qualifier-please see case narrative, data summary package or contact your project manager for details.
Y QC Samples were not spiked with this compound.
h Sample preparation or preservation holding time exceeded.

The above sample is reported on an "as received" basis.

This data report has been prepared and reviewed in accordance with General Engineering Laboratories, LLC standard operating procedures. Please direct any questions to your Project Manager, Stacy Griffin.

Re: Contract No. 12631-0011 2P

Dear Ms. Valdez:

I am sending you the data package for five water samples for release # 1806S that were analyzed for radiochemistry parameters.

General Engineering Laboratories appreciates this opportunity to provide you with analytical results, and trusts that you will find everything in order and to your satisfaction. If you have any questions, please do not hesitate to call me at (843) 769-7394.

Yours very truly,

Stacy L. Griffin
Project Manager

GENERAL NARRATIVE

CASE NARRATIVE
for
Los Alamos National Laboratory
Contract No. 12631-0011 2P
Release 1806S

August 6, 2003

Laboratory Identification:

General Engineering Laboratories, LLC.

Mailing Address:

P.O. Box 30712
Charleston, South Carolina 29417

Express Mail Delivery and Shipping Address:

2040 Savage Road
Charleston, South Carolina 29407

Telephone Number:

(843) 556-8171

Summary:

Sample receipt

Five water samples for Los Alamos National Laboratory SMO release #1806S arrived at General Engineering Laboratories, LLC., (GEL) Charleston, South Carolina on July 17, 2003 for environmental analyses. The sample containers were delivered with chain of custody documentation and signatures. The sample containers were received at 20°C temperature. The sample containers arrived without any visible signs of tampering or breakage.

The laboratory received the following samples:

Laboratory Identification	Sample Description
84373001	GW05-03-51063
84373002	GW05-03-51065
84373003	GW05-03-51083
84373004	GW05-03-51089
84373005	GW05-03-51091

Internal Chain of Custody:

Custody was maintained for these samples.

Data Package:

The enclosed data package contains the following sections: Case Narrative, Chain of Custody, Cooler Receipt Checklist, and Radiochemistry.

I certify that this data report is in compliance with the terms and conditions of the subcontract and task order, both technically and for completeness, for other than the conditions detailed in the attached case narrative.

SOP Reference
Procedure for preparation, analysis and reporting of analytical data are controlled by General Engineering Laboratories, LLC as Standard Operating Procedure (SOP). The data discussed in this narrative has been analyzed in accordance with GL-RAD-A-004 REV.8.

Calibration Information:

Calibration Information
All initial and continuing calibration requirements have been met. The initial calibration was performed on November 9, 2002.

Standards Information
Standard solution(s) for these analyses are NIST traceable and used before the expiration date(s).

Sample Geometry
All counting sources were prepared in the same geometry as the calibration standards.

Quality Control (QC) Information:

Blank Information
The blank volume is representative of the sample volume(s) in this batch.

Designated QC
The following sample was used for QC: 84896001 (CADP-03-52017 1).
The QC sample is from LANL work order 84896.

QC Information
All of the QC samples met the required acceptance limits.

Technical Information:

Holding Time
All sample procedures for this sample set were performed within the required holding time.

Preparation Information
All preparation criteria have been met for these analyses.

Sample Re-prep/Re-analysis
None of the samples in this sample set required reprep or reanalysis.

Chemical Recoveries
All chemical recoveries meet the required acceptance limits for this sample set.

Miscellaneous Information:

NCR Documentation
No NCR was generated for the preparation or analysis of this sample set.

Qualifier information
Manual qualifiers were not required.

Certification Statement
Where the analytical method has been performed under NELAP certification, the analysis has met all of the requirements of the NELAC standard unless otherwise noted in the analytical case narrative.

Review Validation:
GEL requires all analytical data to be verified by a qualified data validator. In addition, all data designated for CLP or CLP-like packaging will receive a third level validation upon completion of the data package.
The following data validator verified the information presented in this case narrative:

Reviewer: Heather Cu cox **Date:** 8/8/03

The following Analytical Methods were performed

Method	Description
1	EPA 905.0 Modified

Notes:
TPU is calculated at the 67% confidence level (1-sigma).
The Qualifiers in this report are defined as follows :

< Result is less than amount reported.
> Result is greater than amount reported.
B Target analyte was detected in the sample as well as the associated blank.
BD Flag for results below the MDC or a flag for low tracer recovery.
E Concentration of the target analyte exceeds the instrument calibration range.
H Analytical holding time exceeded.
J Indicates an estimated value. The result was greater than the detection limit, but less than the reporting limit.
P The response between the confirmation column and the primary column is >40%D.
U Indicates the target analyte was analyzed for but not detected above the detection limit.
UI Uncertain identification for gamma spectroscopy.
X Lab-specific qualifier-please see case narrative, data summary package or contact your project manager for details.
Y QC Samples were not spiked with this compound.
h Sample preparation or preservation holding time exceeded.

The above sample is reported on an "as received" basis.

This data report has been prepared and reviewed in accordance with General Engineering Laboratories, LLC standard operating procedures. Please direct any questions to your Project Manager, Stacy Griffin.

QC Summary

Workorder: 84373

Parmname	NOM	Sample	Qual	QC	Units	RER	REC%	Range	Anlst	Date	Time

N/A indicates that spike recovery limits do not apply when sample concentration exceeds spike conc. by a factor of 4 or more.
** Indicates analyte is a surrogate compound.
^ The Relative Percent Difference (RPD) obtained from the sample duplicate (DUP) is evaluated against the acceptence criteria when the sample is greater than five times (5X) the contract required detection limit (RL). In cases where either the sample or duplicate value is less than 5X the RL, a control limit of +/- the RL is used to evaluate the DUP result.
For PS, PSD, and SDILT results, the values listed are the measured amounts, not final concentrations.

Where the analytical method has been performed under NELAP certification, the analysis has met all of the requirements of the NELAC standard unless qualified on the QC Summary.

RAW DATA

Radiochemistry Batch Checklist, Rev 3

Batch# 266716 Product: SR90 Date: 8/6/03

Criteria:	Yes	No	Comments
Sample Solids are less than 100 mg	✓		
If activity less 10* RDL, error is 150% or less of sample activity. If greater 10* RDL, error is 40% or less. If below the RDL, error is okay.	✓		
Instrument source check is within limits. Instument bkg check is within limits.	✓		
Method RDL has been met.	✓		
If duplicate activities are less 5* RDL, then rpd is 100% or less. If greater 5*, then rpd 20% or less. If below the RDL, the rpd is 0%.	✓		
Tracer yield is 15-125% . WSRC is 25-125%. Carrier yield is 25-125% .	✓		
Method blank is less than the RDL. (If rad samples, < 5% of lowest activity)	✓		
Sample was run within hold time. Special requirements page checked	✓		
Sample was correctly preserved if required.	✓		
Smears Taken for Radioactive batches.	N/A		
Method Spike and LCS are within 75-125%.	✓		
No blank spaces on data forms. All lineouts initialed and dated. No transcription errors are apparent.	✓		
QC data entered into QC database. Batch entered into Case Narrative.	✓		
Batch non-conformances completed if applicable.	✓

STANDARDS DATA

0133

[redacted]

UKAS ACCREDITED CALIBRATION LABORATORY No. 0146

Measurement

Reference time for solution number S6/7/19:	**1200 GMT on 1 April 1996**	
Radioactive concentration of strontium-90:	477.1	kilobecquerels per gram of solution
which is equivalent to:	12.89	microcuries per gram of solution
Mass of solution:	5.0669	grams
Total activity of strontium-90:	2.417	megabecquerels
which is equivalent to:	65.3	microcuries

Method of measurement used (see page 3 of the certificate): K

Calibration dates: 25 March 1996 to 27 March 1996

The calibration date is provided for added information only, and must not be confused with the reference date on pages 1 and 2 of the certificate. It is the reference date that must be used in all calculations relating to the values of activity.

Accuracy

Expanded uncertainty in the radioactive concentration quoted above: ± 0.80 %

Combined Type A uncertainty : ± 0.05 %

Combined Type B uncertainty : ± 0.40 %

Radionuclidic purity

The estimated activities of any radioactive impurities found by high-resolution gamma ray spectrometry, or in any other examination of the solution, are listed below expressed as percentages of the activity of the principal radionuclide at the reference time.

Other radionuclides 0.0005(3) %

Chemical composition

0.1 M HCl containing 100 micrograms of strontium and 100 micrograms of yttrium per ml.

Physical data

Recommended half life: 29.12 ± 0.24 years (1 year = 365.25 days)

Strontium-90: 100% beta particle emission.
Yttrium-90: 100% beta particle emission. Half life 64.1 ± 0.1 hours.

The activity of the yttrium-90 is equal to the activity of the strontium-90.

Remarks

This product meets the quality assurance requirements for achieving traceability to NIST as defined in ANSI N42.22-1995.

Tests made over a period of 2 years on standardised solutions of strontium-90 stored in glass ampoules have shown that loss of strontium-90 from solution is negligible other than by radioactive decay.

NAMAS
CALIBRATION
No. 0146

ISSUED BY:	Nycomed Amersham plc Radiation & Radioactivity Calibration Laboratory Amersham Laboratories White Lion Road Amersham Buckinghamshire HP7 9LL	ISSUED FOR:	AEA Technology plc Isotrak Amersham Laboratories White Lion Road Amersham Buckinghamshire HP7 9LL

Description Principal radionuclide: Strontium-90

Product code: SIZ64
Solution number: S6/7/19

Measurement Reference time: 1200 GMT on 1 April 1996

Nuclear data Nuclear data quoted on this certificate are taken from the Joint European File, Version 2.2.

Expression of uncertainties The reported expanded uncertainty is based on a standard uncertainty multiplied by a coverage factor $k = 2.00$, which for a t-distribution with $\nu_{eff} = \infty$ effective degrees of freedom corresponds to a coverage probability of approximately 95%. The uncertainty evaluation has been carried out in accordance with UKAS requirements.

Unless indicated, all other uncertainties are expressed at the confidence level associated with one standard uncertainty.

The format used for the uncertainties in the values of radionuclidic purity is illustrated by the following examples;

6.5(21)	=	6.5 ± 2.1
6.54(21)	=	6.54 ± 0.21
6.543(21)	=	6.543 ± 0.021

Approved Signatory W. F. Case

Date of issue 11 May 1999

QC-5-024-060A

Nycomed Amersham

W F Case

42

This certificate is issued in accordance with the requirements of the United Kingdom Accreditation Service as specified in the NAMAS

[redacted]

UKAS ACCREDITED CALIBRATION LABORATORY No. 0146

Methods of measurement

The measurement techniques listed below are currently in use at Nycomed Amersham for the absolute standardisation of radioactive solutions. The methods used for this standardisation are indicated on page 2 of the certificate.

Using a gas flow proportional counter

A	4 pi beta counting
B	4 pi alpha counting
C	4 pi internal conversion electron counting
D	4 pi coincidence counting
E	4 pi anticoincidence counting
F	4 pi coincidence and anticoincidence counting

Using a liquid scintillation counter

G	4 pi coincidence counting
H	4 pi anticoincidence counting
J	4 pi coincidence and anticoincidence counting
K	4 pi efficiency tracing

SI unit of radioactivity

The S.I. unit of radioactivity is the becquerel

1 becquerel (Bq) = 1 nuclear transformation per second, therefore
1 curie (Ci) = 3.7×10^{10} becquerels exactly

Useful conversion factors are:

1 microcurie (μCi)	=	3.7×10^{4} Bq	=	37 kilobecquerels (kBq)
1 millicurie (mCi)	=	3.7×10^{7} Bq	=	37 megabecquerels (MBq)
1 kilobecquerel (kBq)	=	27.027 nanocuries (nCi)		
1 megabecquerel (MBq)	=	27.027 microcuries (μCi)

RADIOLOGICAL SCREENING DATA RELEASE FORM

The following samples (list samples by number) were received at the Field Support Facility (FSF) without radiological screening data. These samples will not be shipped until radiological screening documentation arrives at the FSF. I understand that it is my responsibility to ensure that this information arrives at the FSF in a timely manner. **If holding times are missed because screening data do not arrive, I will pick up the samples when called to do so.**

****

The following samples (list samples by number) do not require radiological screening for the reason stated.

Assaigai Analytical Laboratories, Inc.

Certificate of Analysis

Client: **LANL-DDP03-0271-014,RM100 E SI**

Project: **XURP 0450 3219 0000, 1199S&1203S**

Order: **0209364** **LOS40** Receipt: **09-17-02**

Unless otherwise noted, all samples were received in acceptable condition and all sampling was performed by client or client representative. Sample result of ND indicates Not Detected, ie result is less than the sample specific Detection Limit. Sample specific Detection Limit is determined by multiplying the sample Dilution Factor by the listed Reporting Detection Limit. All results relate only to the items tested. Any miscellaneous workorder information or foonotes will appear below.

1 The relative percent difference between the sample and the sample duplicate was slightly above AALI's QC criteria of less than or equal to 20% at 22% due to a nonhomogenous sample matrix

MEMO: Hexavalent Chromium was analyzed by zeroing the spectrophotometer on an undeveloped aliquot of sample, then reading the developed sample. This method was utilized in attempt to eliminate the high bias attributed to the sample extract turbidity. However, the reported values may still be biased high due to this high turbidity.

Data Validation Cover Sheet

Section I. Data Record Package Identification

Request Number: 1203S Validation Date: 21-Nov-02 Lab Code: _____

Contract Laboratory Name: Assaigai

Validator: Keith Greene Organization: RRES

Analytical Suite(s): (check all that apply)

- ☐ Volatile Organics
- ☐ Semivolatile Organics
- ☐ Organochlorine Pesticides/Polychlorinated Biphenyls
- ☒ Other: 7196A (describe)
- ☐ High Explosives
- ☒ Inorganics
- ☐ Radiochemistry

Section II. Completeness Check

Yes	No	n/a	(check one)	Yes	No	n/a	(check one)
☒	☐	☐	1. Chain-of-custody form(s)	☒	☐	☐	6. Raw/BSS data
☒	☐	☐	2. Case narrative	☒	☐	☐	7. Quality control forms
☒	☐	☐	3. Sample result forms	☒	☐	☐	8. Quantitation reports
☐	☐	☒	4. Sample chromatograms	☐	☐	☒	9. TICs forms
☐	☐	☒	5. Standard chromatograms	☐	☐	☒	10. TICs mass spectra

Identify any samples in the assigned Request Number that are missing:

_____ _____ _____ _____ _____ _____ _____ _____

_____ _____ _____ _____ _____ _____ _____ _____

Comments/problems noted (include information about requests for further information submitted to the contract laboratory and agreed upon date of resolution and contract laboratory point of contact): Cr 6+ - No qualification needed.

Metals - Antimony is qualified as estimated (UJ, I3e) because the matrix spike was low. The raw data is reported without Correction for moisture, but the EDD is, values were verified.

(Attach additional comment sheets as necessary)

Dear Keith Greene,

Please find enclosed Assaigai Analytical Laboratories, Inc. Level IV data package for LANL request numbers 1203S. The original chain of custody was sent on October 25, 2002. A copy of the chain of custody was been enclosed in the data package. Electronic data results were e-mailed to kgreene@lanl.gov on 10/24/02. If you have any questions please call me at (505) 345-8964.

Respectfully,

John P. Morris

Member:
American Council of
Independent Laboratories, Inc.

QC NARRATIVE FOR PROJECT 1203S

GENERAL

On 9/17/02 Assaigai Analytical Laboratories, Inc. (AALI) received seventeen soil samples from Los Alamos National Labs. The samples were received on ice in a "milk crate" rather than a cooler. AALI requires all samples to be preserved at 4 °C ± 2, therefore a non-conformance report was issued for these samples. The only samples that would be affected by this non-conformance event are the Hg and Cr (VI). Keith Greene performed the sampling for Los Alamos National Labs (Request number: 1203S). The analyses requested were Hexavalent Chromium by EPA 218.4 (Chelation Extaction), Metals: Al, Sb, As, Ba, Be, B, Cd, Cr, Co, Cu, Fe, Pb, Li, Mg, Mn, Mo, Ni, K, Se, Si, Ag, Na, Sr, Tl, Sn, Ti, U, V & Zn SW846-3050A/6020, and Hg by SW846-7471A.

INITIAL/CONTINUING CALIBRATION (ICV & CCV)

The ICV for the SW846-6020 analysis was inadvertently spiked at 100 ppb instead of the usual 120 ppb, therefore the ICV was flagged as out of criteria. The ICV recovery for the 100 ppb spike is 106% which is within the required ± 10% criteria. All results are valid as reported.

The percent recoveries for Si in the ICV and in all CCV's were outside of the SW846-6020 QC criteria. The sample results were flagged with an "E" for estimated value.

All other initial and continuing calibrations met all QA/QC criteria for analytes of interest in the other analyses requested.

METHOD BLANK (MB)

The method blank for the SW846-6020 analysis was positive for Al, Ca, Fe, Pb, Mg, Mn, Mo, K, Na, Cu, and Ti. The reported sample results are greater than five times the method blank level, and are therefore, valid as reported. The method blank was also positive for Sn, but in this case the reported sample results are not greater than five times the blank level, and are therefore, flagged with a "B" for blank contamination.

All other laboratory method blanks associated with the analyses were free of target analytes.

LABORATORY CONTROL SAMPLE AND DUPLICATE (LCS/LCSD)

The LCS/LCSD recoveries and RPDs associated with all analyses were within AALI's QC criteria limits.

REPRODUCTION OF THIS REPORT IN LESS THAN FULL REQUIRES THE WRITTEN CONSENT OF AAL.
THIS REPORT MAY NOT BE USED IN ANY MANNER BY THE CLIENT OR ANY OTHER THIRD PARTY TO CLAIM
PRODUCT ENDORSEMENT BY THE NATIONAL VOLUNTARY LABORATORY ACCREDITATION PROGRAM.

MATRIX SPIKE AND DUPLICATE (MS/MSD)

The MS recovery for Hexavalent Chromium was not within AALI's QC limits. The out of criteria MS recovery was due to matrix interference. Sample RE3-02-49287 was utilized for the matrix/matrix spike duplicate.

The MS recovery for Hg was not within AALI's QC limits. The out of criteria MS recovery was due to the non-homogeneous nature of the sample. Sample RE3-02-49280 was utilized for the matrix/matrix spike duplicate.

The MS/MSD recoveries and associated RPDs for Al, Ba, Fe, Li, Si, Ti, Na, Mg, K, Ca, Mn, Sr, Sb and Zn are out of QC criteria due to the high sample concentration relative to the spike value and to matrix interference. Sample RE3-02-49287 was utilized for the SW846 6020 matrix spike/matrix spike duplicate.

MS/MSD recoveries and RPDs associated with all other analyses requested were within AALI's QC limits.

METHODS

All analyses were performed at AALI utilize procedures published in the following manuals, as well as all the latest promulgated updates.

1. Standard Methods for the Examination of Water and Wastewater, 18th Edition, 1992.
2. SW-846, Test Methods for Eval. Solid Waste: Physical/Chemical Methods, 3rd Ed, USEPA, 1986.
3. Annual Book of ASTM Standards.
4. EPA-600/4-79-020 Methods for Chemical Analysis of Water and Wastes, Revised March 1983.
5. EPA-600/4-82-057 Methods for Organic Chemical Analysis of Municipal & Industrial Wastewater, 1982.
6. NIOSH Manual of Analytical Methods, 3rd Edition, 1984.
7. Guidelines Establishing Test Procedures for the Analysis of Pollutants under the Clean Water Act, 40 CFR Part 136, October 1984.

EVENT # 10:

The percent recovery for Si in the ICV and in all CCV's was outside of method criteria, high.

ACTION # 10:

The COA will be flagged with an "E" (estimated value) to alert the client of the event. No further action is required.

QC Non-Conformance Report (NCR)

NCR# MT-02-224

SW846 6020

Batch ID:	**M021282, M021283**
Group:	**MT.2002.1133**
Date:	**10/01/2002**
Work Orders:	**0209364, 0209373**

EVENT # 1:

The ICV was inadvertently spiked at 100 ppb instead of the usual 120 ppb therefore the ICV was flagged as being out of criteria.

ACTION # 1:

The ICV recovery for the 100 ppb spike is 106% which is within the ± 10% criteria. All data is valid as reported.

RADIOLOGICAL SCREENING DATA RELEASE FORM

The following samples (list samples by number) were received at the Field Support Facility (FSF) without radiological screening data. These samples will not be shipped until radiological screening documentation arrives at the FSF. I understand that it is my responsibility to ensure that this information arrives at the FSF in a timely manner. **If holding times are missed because screening data do not arrive, I will pick up the samples when called to do so.**

****

The following samples (list samples by number) do **not** require radiological screening for the reason stated.

Unless otherwise noted, all samples were received in acceptable condition and all sampling was performed by client or client representative. Sample result of ND indicates Not Detected, ie result is less than the sample specific Detection Limit. Sample specific Detection Limit is determined by multiplying the sample Dilution Factor by the listed Reporting Detection Limit. All results relate only to the items tested. Any miscellaneous workorder information or foonotes will appear below.

1 This sample was utilized for the matrix spike and duplicate. Please note that the recoveries were outside of QC criteria, suggesting matrix interference problems. This should be taken into account when reviewing the data.

MEMO: Hexavalent Chromium was analyzed by zeroing the spectrophotometer on an undeveloped aliquot of sample, then reading the developed sample. This method was utilized in attempt to eliminate the high bias attributed to the sample extract turbidity. However, the reported values may still be biased high due to this high turbidity.

Final Page of REQUEST NUMBER 1199S

Data Validation Cover Sheet

Section I. Data Record Package Identification

Request Number: 1199S Validation Date: 05-Dec-02 Lab Code: _____

Contract Laboratory Name: Assaigai

Validator: Keith Greene Organization: RRES

Analytical Suite(s): (check all that apply)

- ☐ Volatile Organics
- ☐ Semivolatile Organics
- ☐ Organochlorine Pesticides/Polychlorinated Biphenyls
- ☒ Other: 7196A (describe)
- ☐ High Explosives
- ☒ Inorganics
- ☐ Radiochemistry

Section II. Completeness Check

Yes	No	n/a	(check one)	Yes	No	n/a	(check one)

☒	☐	☐	2. Case narrative	☒	☐	☐	7. Quality control forms
☒	☐	☐	3. Sample result forms	☒	☐	☐	8. Quantitation reports
☐	☐	☒	4. Sample chromatograms	☐	☐	☒	9. TICs forms
☐	☐	☒	5. Standard chromatograms	☐	☐	☒	10. TICs mass spectra

Identify any samples in the assigned Request Number that are missing:

_____ _____ _____ _____ _____ _____ _____ _____

_____ _____ _____ _____ _____ _____ _____ _____

Comments/problems noted (include information about requests for further information submitted to the contract laboratory and agreed upon date of resolution and contract laboratory point of contact): Cr 6+ - Several samples are qualified not detected (U, I4a) because the uncorrected samples (sample without reagents) had a higher absorbance than the samples with reagents.

Metals - The raw data is reported without Correction for moisture, but the EDD is, values were verified.

(Attach additional comment sheets as necessary)

Dear Keith Greene,

Please find enclosed Assaigai Analytical Laboratories, Inc. Level IV data package for LANL request numbers 1199S. The original chain of custody was sent on October 25, 2002. A copy of the chain of custody has been enclosed in the data package. Electronic data results were e-mailed to kgreene@lanl.gov on 10/24/02. If you have any questions please call me at (505) 345-8964.

Respectfully,

John P. Morris

Member:
American Council of
Independent Laboratories, Inc.

QC NARRATIVE FOR PROJECT 1199S

GENERAL

On 9/17/02 Assaigai Analytical Laboratories, Inc. (AALI) received seventeen soil samples from Los Alamos National Labs. The samples were received on ice in a "milk crate" rather than a cooler. AALI requires all samples to be preserved at 4 °C ± 2, therefore a non-conformance report was issued for these samples. The only samples that would be affected by this non-conformance event are the Hg and Cr (VI). Keith Greene performed the sampling for Los Alamos National Labs (Request number: 1199S). The analyses requested were Hexavalent Chromium by EPA 218.4 (Chelation Extaction), Metals: Al, Sb, As, Ba, Be, B, Cd, Cr, Co, Cu, Fe, Pb, Li, Mg, Mn, Mo, Ni, K, Se, Si, Ag, Na, Sr, Tl, Sn, Ti, U, V & Zn SW846-3050A/6020, and Hg by SW846-7471A.

INITIAL/CONTINUING CALIBRATION (ICV & CCV)

The ICV for the SW846-6020 analysis was inadvertently spiked at 100 ppb instead of the usual 120 ppb, therefore the ICV was flagged as out of criteria. The ICV recovery for the 100 ppb spike is 106% which is within the required ± 10% criteria. All results are valid as reported.

The CCV percent recoveries for Si were outside of the SW846-6020 QC criteria. The sample results were flagged with an "E" for estimated value.

All other initial and continuing calibrations met all QA/QC criteria for analytes of interest in the other analyses requested.

METHOD BLANK (MB)

The method blank for the SW846-6020 analysis was positive for Al, As, Ba, Ca, Cr, Cu, Fe, Pb, Mg, Mn, Mo, K, Na, and Ti. The reported sample results are greater than five times the method blank level, and therefore, valid as reported.

The method blank was also positive for Sn, but in this case the reported sample result is not greater than five time the blank level, and is therefore, flagged with a "B" for blank contamination.

All other laboratory method blanks associated with the analyses were free of target analytes.

Member:
American Council of
Independent Laboratories, Inc.

REPRODUCTION OF THIS REPORT IN LESS THAN FULL REQUIRES THE WRITTEN CONSENT OF AAL.
THIS REPORT MAY NOT BE USED IN ANY MANNER BY THE CLIENT OR ANY OTHER THIRD PARTY TO CLAIM
PRODUCT ENDORSEMENT BY THE NATIONAL VOLUNTARY LABORATORY ACCREDITATION PROGRAM.

LABORATORY CONTROL SAMPLE AND DUPLICATE (LCS/LCSD)

The LCS/LCSD recoveries and RPDs associated with all analyses were within AALI's QC criteria limits.

MATRIX SPIKE AND DUPLICATE (MS/MSD)

The MS recovery for Hg was not within AALI's QC limits. The out of criteria MS recovery was due to the non-homogeneous nature of the sample. Sample RE3-02-49280 was utilized for the Hg matrix spike/matrix spike duplicate.

The MS/MSD recoveries and associated RPDs for Al, Ba, Cr, Cu, Fe, Li, Si, Ti, Na, Mg, K, Ca, and Zn are out of QC criteria due to the high sample concentration relative to the spike value and to the non-homogeneous nature of the sample. Sample RE3-02-49280 was utilized for the SW846 6020 matrix spike/matrix spike duplicate.

MS/MSD recoveries and RPDs associated with all other analyses requested were within AALI's QC limits.

METHODS

All analyses were performed at AALI utilize procedures published in the following manuals, as well as all the latest promulgated updates.

1. Standard Methods for the Examination of Water and Wastewater, 18th Edition, 1992.
2. SW-846, Test Methods for Eval. Solid Waste: Physical/Chemical Methods, 3rd Ed, USEPA, 1986.
3. Annual Book of ASTM Standards.
4. EPA-600/4-79-020 Methods for Chemical Analysis of Water and Wastes, Revised March 1983.
5. EPA-600/4-82-057 Methods for Organic Chemical Analysis of Municipal & Industrial Wastewater, 1982.
6. NIOSH Manual of Analytical Methods, 3rd Edition, 1984.
7. Guidelines Establishing Test Procedures for the Analysis of Pollutants under the Clean Water Act, 40 CFR Part 136, October 1984.

QC Non-Conformance Report (NCR)

NCR# MT-02-219

SW846 6020
Batch ID: M021282
Group: MT.2002.1109
Date: 09/24/2002
Work Orders: 0209364

EVENT # 10:

The percent recovery for Si in all CCV's was outside of method criteria, high.

ACTION # 10:

The COA will be flagged with an "E" (estimated value) to alert the client of the event. No further action is required.

QC Non-Conformance Report (NCR)

NCR# MT-02-220

SW846 6020
Batch ID: M021283
Group: MT.2002.1110
Date: 09/25/2002
Work Orders: 0209373

EVENT # 10:

The percent recovery for Si in the ICV and in all CCV's was outside of method criteria, high.

ACTION # 10:

The COA will be flagged with an "E" (estimated value) to alert the client of the event. No further action is required.

(1) * Zn, Sr, Ba Ti, Mn, Fe, Na, Mg, Al, Si, K, Ca are outside of QA/QC criteria due to the high sample concentration relative to the spike level.

(2) * ~~Zn~~ gB 9/25/02 Sb is outside of QA/QC criteria due to matrix interference.

gB 9/25/02

QC Non-Conformance Report (NCR)

NCR# MT-02-224

SW846 6020

Batch ID:	**M021282, M021283**
Group:	**MT.2002.1133**
Date:	**10/01/2002**
Work Orders:	**0209364, 0209373**

EVENT # 1:

The ICV was inadvertently spiked at 100 ppb instead of the usual 120 ppb therefore the ICV was flagged as being out of criteria.

ACTION # 1:

The ICV recovery for the 100 ppb spike is 106% which is within the ± 10% criteria. All data is valid as reported.

REQUEST NUMBER: 10-1648

LOS ALAMOS
NATIONAL LABORATORY

ATTN: Valerie Davis

General Engineering Laboratories, Inc., Charleston, SC.

2040 Savage Rd

Charleston, SC 29407

These Samples are on:

LANL Request Number:10-1648

Per Agreement Number:126310011

Project Cost Code: MR2A0515BYDO

Please analyse the enclosed samples according to the schedule indicated:

SHIP DATE: 2/5/2010

TURNAROUND/REPORT DUE: 2/15/2010

TURNAROUND REQ'D: 10 Days

RAD SCREENING: Not Required

LAB REQUEST COMMENTS:

Re: LANL ER Project
Work Order: 246429
SDG: 10-1648

Dear Ms. Valdez:

GEL Laboratories, LLC (GEL) appreciates the opportunity to provide the following analytical results for the sample(s) we received on February 06, 2010, and analyzed for GC Semivolatile PCB. This original data report has been prepared and reviewed in accordance with GEL's standard operating procedures.

Our policy is to provide high quality, personalized analytical services to enable you to meet your analytical needs on time every time. We trust that you will find everything in order and to your satisfaction. If you have any questions, please do not hesitate to call me at (843) 556-8171, ext. 4485.

Sincerely,

for

Valerie Davis

Case Narrative

Case Narrative for
Los Alamos National Laboratory (72733-001-09)
LANL ER Project
Workorder #: 246429
SDG # : 10-1648

February 12, 2010

Laboratory Identification:

GEL Laboratories LLC
2040 Savage Road
Charleston, South Carolina 29407
(843) 556-8171

Summary

Sample receipt The samples arrived at GEL Laboratories LLC, Charleston, South Carolina on February 06, 2010 for analysis. The samples were prepared/analyzed within the required holding time. Shipping container temperatures were checked, documented, and within specifications. The samples were screened according to GEL Standard Operating Procedure. The samples were delivered with proper chain of custody documentation and signatures. All sample containers arrived without any visible signs of tampering or breakage. Containers were checked for pH, where appropriate, and matched the preservative as documented on the accompanying chain of custody. Shipping container temperature was within specification (0 - 6C).

Sample Identification The laboratory received the following samples:

Laboratory ID	Client ID
246429001	RE03-10-12114
246429002	RE03-10-12115
246429003	RE03-10-12113

Case Narrative

Sample analyses were conducted using methodology as outlined in GEL Laboratories, LLC (GEL) Standard Operating Procedures. Any technical or administrative problems during analysis, data review, and reduction are contained in the analytical case narratives in the enclosed data package.

Data Package The enclosed data package contains the following sections: Case Narrative, Chain of Custody, Cooler Receipt Checklist, Data Package Qualifier Definitions and data from the following fractions: GC Semivolatile PCB.

I certify that this data report is in compliance with the terms and conditions of the subcontract and task order, both technically and for completeness, for other than the conditions detailed in the attached case narrative.

for

Valerie Davis

Project Manager

SAMPLE RECEIPT & REVIEW FORM

Client: LANL	**SDG/ARCOC/Work Order: 10-1648**
Received By: Patricia Dover-Dent	**Date Received: February 6, 2009**

Suspected Hazard Information	**Yes**	**No**	*If Counts > x2 area background on samples not marked "radioactive", contact the Radiation Safety Group of further investigation.
COC/Samples marked as radioactive?		X	Maximum Counts Observed*: **80 CPM**
Classified Radioactive II by RSO?		X	
COC/Samples marked containing PCBs?		X	
Shipped as a DOT Hazardous?		X	Hazard Class Shipped: UN#:
Samples identified as Foreign Soil?		X	

	Sample Receipt Criteria	**Yes**	**NA**	**No**	**Comments/Qualifiers (Required for Non-Conforming Items)**
1	Shipping containers received intact and sealed?	X			Circle Applicable: seals broken damaged container leaking container other (describe)
2	Samples requiring cold preservation within 0 ≤ 6 deg. C?	X			Preservation Method: ice bags **blue ice** dry ice **none** other (describe **2-6** **12,15C**
3	Chain of custody documents included with shipment?	X			
4	Sample containers intact and sealed?	X			Circle Applicable: seals broken damaged container leaking container other (describe)
5	Samples requiring chemical preservation at proper pH?		X		Sample ID's, containers affected and observed pH: If Preservation added, Lot#:
6	VOA vials free of headspace (defined as < 6mm bubble)?		X		Sample ID's and containers affected:
7	Are Encore containers present?			X	(If yes, immediately deliver to Volatiles laboratory)
8	Samples received within holding time?	X			Id's and tests affected:
9	Sample ID's on COC match ID's on bottles?	X			Sample ID's and containers affected:
10	Date & time on COC match date & time on bottles?			X	Sample ID's affected: **time written on containers, not on COC**
11	Number of containers received match number indicated on COC?	X			Sample ID's affected:
12	COC form is properly signed in relinquished/received sections?	X

Data Review Qualifier Flag Definition Sheet

Data Review Qualifier Definitions

Qualifier	Explanation
*	A quality control analyte recovery is outside of specified acceptance criteria
**	Analyte is a surrogate compound
<	Result is less than value reported
>	Result is greater than value reported
^	RPD of sample and duplicate evaluated using +/-RL. Concentrations are <5X the RL
A	The TIC is a suspected aldol-condensation product
B	Target analyte was detected in the associated blank
B	Metals-Either presence of analyte detected in the associated blank, or MDL/IDL < sample value < PQL
BD	Results are either below the MDC or tracer recovery is low
C	Analyte has been confirmed by GC/MS analysis
D	Results are reported from a diluted aliquot of the sample
d	5-day BOD-The 2:1 depletion requirement was not met for this sample
E	Organics-Concentration of the target analyte exceeds the instrument calibration range
E	Metals-%difference of sample and SD is >10%. Sample concentration must meet flagging criteria
H	Analytical holding time was exceeded
h	Preparation or preservation holding time was exceeded
J	Value is estimated
N	Metals-The Matrix spike sample recovery is not within specified control limits
N	Organics-Presumptive evidence based on mass spectral library search to make a tentative identification of the analyte (TIC). Quantitation is based on nearest internal standard response factor
N/A	Spike recovery limits do not apply. Sample concentration exceeds spike concentration by 4X or more
ND	Analyte concentration is not detected above the reporting limit
UI	Gamma Spectroscopy-Uncertain identification
X	Consult Case Narrative, Data Summary package, or Project Manager concerning this qualifier
Y	QC Samples were not spiked with this compound
Z	Paint Filter Test-Particulates passed through the filter, however no free liquids were observed.

GC SEMIVOLATILE PCB ANALYSIS

PCB Case Narrative
Los Alamos National Laboratory (LANL)
SDG 10-1648

Method/Analysis Information

Procedure:	**Analysis of Polychlorinated Biphenyls by ECD**
Analytical Method:	SW846 8082
Prep Method:	SW846 3550B
Analytical Batch Number:	950900
Prep Batch Number:	950899

Sample Analysis

The following samples were analyzed using the analytical protocol as established in SW846 8082:

Sample ID	Client ID
246429001	RE03-10-12114
246429002	RE03-10-12115
246429003	RE03-10-12113
1202037817	Method Blank (MB)
1202037818	Laboratory Control Sample (LCS)
1202037819	Laboratory Control Sample Duplicate (LCSD)

The samples in this SDG were analyzed on an "as received" basis.

Preparation/Analytical Method Verification

SOP Reference
Procedure for preparation, analysis and reporting of analytical data are controlled by GEL Laboratories LLC as Standard Operating Procedure (SOP). The data discussed in this narrative has been analyzed in accordance with GL-OA-E-040 REV# 14.

Raw data reports are processed and reviewed by the analyst using the Target software package. False positives have been removed from the Target quantitation reports per standard operating procedures (SOP) section 23.0.

Calibration Information

Please note that the 'Cal Date' indicated on each quantitation report reflects the date and time of the most recent calibrated analyte(s) in the Target processing method. Since the laboratory may calibrate with multiple solutions on different days using the same processing method, the Target software will update the 'Cal Date' to the last calibration file, date and time. The correct dates and times for all calibration files are located on the Calibration History report in the Standard Data section in the data package.

Due to software limitations, the Calibration Summary Form 6 may not indicate all the calibration files comprising the initial calibration. A complete list of the initial calibration data files are shown in the Calibration History report located in the Standard Data section of the data package.

Initial Calibration
All initial calibration requirements have been met for this sample delivery group (SDG).

The linear equation used in Target and indicated on the initial calibration summary form is not a conventional linear equation (slope intercept formula) and does not match the equation found in SW-846 method 8000B. The x and y axes are inversed in Target, so that the instrument response is treated as the independent variable (x) and the concentration ratio is treated as the dependent variable (y). The equation used in Target to calculate sample results is adjusted to account for the linear equation inversion and reciprocal slope. The adjusted calculation has been independently verified to produce valid results.

Continuing Calibration Verification (CCV) Requirements
All associated calibration verification standard(s) (ICV or CCV) met the acceptance criteria.

Quality Control (QC) Information

Method Blank (MB) Statement
The MB analyzed with this SDG met the acceptance criteria.

Surrogate Recoveries
All surrogate recoveries were within the established acceptance criteria for this SDG.

Laboratory Control Sample (LCS) Recovery
The LCS spike recoveries met the acceptance limits.

Laboratory Control Sample Duplicate (LCSD) Recovery
The LCSD spike recoveries met the acceptance limits.

LCS/LCSD Relative Percent Difference (RPD) Statement
The RPD between the LCS and LCSD met the acceptance limits.

QC Sample Designation
The matrix spike and matrix spike duplicate analysis was not performed for this batch. The LCS and LCSD analysis was performed to measure the precision and accuracy for the batch.

Technical Information

Holding Time Specifications
GEL assigns holding times based on the associated methodology, which assigns the date and time from sample collection of sample receipt. Those holding times expressed in hours are calculated in the AlphaLIMS system. Those holding times expressed as days expire at midnight on the day of expiration. All samples in this SDG met the specified holding time.

Preparation/Analytical Method Verification
All procedures were performed as stated in the SOP. All sample extracts were cleaned using alumina.

Sample Dilutions
Samples 246429001 (RE03-10-12114) (1:20), 246429002 (RE03-10-12115) (1:5) and 246429003 (RE03-10-12113) (1:5) were diluted due to the presence of over-range target analytes.

Sample Re-extraction/Re-analysis
Re-extractions or re-analyses were not required in this SDG.

Miscellaneous Information

Electronic Package Comment

The following package was generated using an electronic data processing program referred to as "virtual packaging". In an effort to increase quality and efficiency, the laboratory is developing systems to eventually generate all data packages electronically. The following change from "traditional" packages should be noted:

Analyst/peer reviewer initials and dates are not present on the electronic data files. Presently, all initials and dates are present on the original raw data. These hard copies are temporarily stored in the laboratory. An electronic signature page inserted after the case narrative of each electronic package will indicate the analyst, reviewer, and report specialist names associated with the generation of the data and package. The data validator will always sign and date the case narrative. Data that are not generated electronically, such as hand written pages, will be scanned and inserted into the electronic package.

Data Exception (DER) Documentation
Data exception report (DER) is for documentation of any procedural anomalies that may deviate from referenced SOP or contractual document. A DER was not required for this SDG.

Manual Integration
Certain standards and samples may have required manual integration to correctly position the baseline as set in the calibration standard injections. If manual integration was performed, copies of all manual integration peak profiles are included in the raw data section of this PCB fraction.

Additional Comments
The additional comments field is used to address special issues associated with each analysis, clarify method/contractual issues pertaining to the analysis, and to list any report documents generated as a result of sample analysis or review. The following additional comments were required:

The higher results from either column have been chosen and reported in the data package for the client samples, MB and LCS. The data reported for the LCSD is from the same analytical column as the LCS.

The data reported on the form I and III may differ slightly from the data reported on the form X. This is due to software limitations in rounding differences between the forms.

Aroclors quantitated on the raw data report by the Target data system do not necessarily represent positive Aroclor identification. In order for positive identification to be made, the Aroclor must match in pattern and retention time; as well as quantitate relatively close between the primary and confirmation columns, as specified in SW846 method 8000. When these conditions are not met, the Aroclor is reported as a non-detect on the data report. These situations will be noted on the raw data as DMP, representing does not match pattern, or DNC does not confirm.

Due to software limitation, the Form VIIs will display the results either in the % difference or % drift depending on the type of the calibration curve. If the curve of all analytes is generated using an average response factor (RF), the Form VII will display results using the %difference calculation (RF). If the curve of one or more analytes is generated using a linear curve, the Form VII will display results using the % drift calculation (by concentration) for all analytes.

System Configuration

The Semi-Volatiles-PCB analysis was performed on the following instrument configuration:

Instrument ID	Instrument	System Configuration	Column ID	Column Description
ECD8A.I_1	HP Gas Chromatograph	HP6890 Series ECD	Rtx-CLP I	30m x 0.25mm, 0.25um (Rtx-CLPesticide I)
ECD8A.I_2	HP Gas Chromatograph	HP6890 Series ECD	Rtx-CLP II	30m x 0.25mm, 0.20um (Rtx-CLPesticide II)

Certification Statement

Where the analytical method has been performed under NELAP certification, the analysis has met all of the requirements of the NELAC standard unless otherwise noted in the analytical case narrative.

Review Validation

GEL requires all analytical data to be verified by a qualified data validator. In addition, all data designated for CLP or CLP-like packaging will receive a third level validation upon completion of the data package.

The following data validator verified the information presented in this case narrative:

Comments/problems noted (include information about requests for further information submitted to the contract laboratory and agreed-upon date of resolution and contract laboratory point of contact):

1. The CCV %Ds were >20% for chloromethane, bromomethane, trichlorofluoromethane and acetone. The associated sample results were NDs and, thus, were qualified UJ,V7c.
