COMMUNICATION RECORD TA-21 '05

Job No. 04-009		
Phone In ☑ Meeting ☐ Prospective Job ☐ Past Job ☐ Marketing ☐ Phone Out ☐ Other ☐ Current Job ☐ Admin. ☐	Route to:	Date: 12/5/05
File Name (owner): MDA V-TA-21		Time: AM or PM 11:00
Person: Becky Coel-Roback	Firm: LANL	Phone No.: 665-5011
		Recorded By: KMC

Subject: MDA V - VOC sampling

Remarks:

- Becky received the VOC data from summa canister sampling → there are hits of VOCs
- Of the registered hits (not greater than 260 ppb) they are in the shallow sample of the BHs closest to the parking lot - not in the beds.
- 2 options:
  1) Work plan says must go back + resample w/i 30 days if VOCs are detected → instead, go back and re-mount the holes after all heavy equipment is removed
  2) Re-sample the holes that are accesible now, to meet the 30 day requirement, and check results. → may have to go back out.

Action Required: Will speak w/ Darlene and get back to Becky

Action Taken: - No Problem w/ waiting to re-sample

Route to:

Date: 12/5/05

File Name (owner)

Time: (AM) or PM 11:30

Person	Firm	Phone No.	Recorded By:
Becky Coel-Roback	LANL	665-5011	KMC

Subject: MDA V - VOC sampling

Remarks:

(1) They are having a problem getting waste shipped off-site → will be asking for an extension

(2) We told Becky that waiting to re-sample for VOCs is not a problem. She should roll that request into extension request letter. The extension would be for 60 days.

Action Required: LANL will send letter - extension request + VOC sampling requirements (longer than 30 days)

Action Taken:
