Subject: MDA V - Response to NOD (21-018(a)-99)

Remarks:

① Comment #5: How does NMED want to deal with remedial action remaining at MDA V?

- LANL should address the additional sampling and any soil removal under the DP Aggregate Area Work Plan/Investigation (should be discussed in IR)

- However - once the additional sampling and/or removal is completed - LANL should submit a letter to NMED, which details the sampling methods + locations, analytical results and a description of field activities.

↳ this way - if everything is clean, MDA V can be granted "Corrective Action complete w/o controls" rather than waiting for DP Aggregate IR to be submitted.

Action Required:

LANL agreed - once work is complete, a letter will be sent to NMED describing the activities.

Action Taken:
