OFFICE MEMORANDUM

TO : C. A. Reynolds, Eng. 4

DATE: November 9, 1960

Rec'd ENG-DO NOV 10 1960

File L.J. 1757

FROM : G. R. Champion, ADP-SF

SUBJECT: RECOVERY OF NORMAL URANIUM TURNINGS FROM HOT DUMP

SYMBOL : ADP-SF

During December 1959, 557 drums of tuballoy turnings were moved from shop 13 and placed in Area "C" of Pit No. 5 between posts 56 and 62. These drums were covered with dirt on December 18, 1959 by the Zia Roads Section.

Twenty two (22) of these drums contained normal uranium turnings and should not have been moved to the dump.

It is requested that the drums be uncovered and the ones containing normal uranium be retrieved.

It will be appreciated if you will furnish me with a "guesstimate" on the cost of this operation.
