Dear Richard Mitzelfelt,

I just want you to know that I am against giving permission for any incineration of Radioactive & Hazardous Wastes in Los Alamos, & anywhere in our state, until we have federal and state regulations on radioactive emissions. I am also concerned about LANL's "temporary permit" for burning radioactive & hazardous waste without any environmental assessment on my environment. Have they really been using it for NINE YEARS? Please look into it. Thank you, TC Sheren Noon
