Subject: Fax # for decision; response to Wade letter being prepared and DOE may have to fax response on due date of 10/20/89.

Discussion

Asked about the EA or EIS. There's an EA on the trucwaste transportation issue. A small part of that report contained info on the incinerator. They are taking that report + info on the proposed low level mixed waste incinerator and doing an EIS. The proposed incinerator will be for low level waste + mixed waste, will be in the bldg at TA50 and use the same air emission system as the CIA. Told him we were told that the proposed incinerator was for low level waste only not mixed waste. Said he would check for me but they been talking about mixed waste for 1½ years and no deviation indicated 3:15 p.m. Both the CIA and the proposed incinerator ~~is~~ are for mixed waste. ~~A few~~ At some time in the future the proposed incinerator will become the primary incin. for low level waste + mixed waste. The CIA will become the incin for trucwaste. They do need the CIA for hazardous waste right now. Once state has authority for mixed the Part B for mixed waste in the CIA will be submitted.
