FIELD REPORT

CAFM

Project: Melrose Bombing Range OD			Date: 6/22/05
Owner: CAFB			Report No. 1
Prepared by: DC	Location: Melrose BR.	Arrival Time: 8:30	Page: 1 of
Purpose of Visit: Closure Verification	Weather:	Depart. Time: 11:30	Permit No.

Met Denny Timmons and Sheila Newman at the Melrose Bombing Range Offices and went out to the OD site located on the target Range area. The area is fenced w/a 100'x 150' burned area in the NW corner. Sheila told us that the area was burned during a training exercise using tracer ammunition. The site contains only low vegetation (< 3' tall) and the area had recently been cleared. No scrap was observed w/ the exception of a rusted box. No concrete was observed. Based on observation, the unit does not appear to have been constructed and is considered to be closed.

This serves as the verification that the Melrose Bombing Range OD unit is closed.

John Kieling took photos of the OD unit and SWMUs 114, 115, 117 AOCs 1, 2, 3, & 4.

This report presents opinions formed as a result of our observation of activities relating to geotechnical engineering. We rely on the contractor to comply with the plans and specifications throughout the duration of the project irrespective of the presence of our representative. Our work does not include supervision or direction of the actual work of the contractor, his employees or agents. Our firm will not be responsible for job or site safety on this project.
