RE: Technical Review Notice of Deficiency Response

Dear Ms Hoditschek:

Enclosed please find Rinchem's response to the Technical Review Notice of Deficiency dated April 24, 1996. As requested we have sent a hardcopy and 3.5 diskette in Word 5.2. We have adapted our application to include the additional information requested.

We feel the RCRA Facility Assessment conducted in 1987 is outdated due to changes in operations at our facility and would request a re-assessment to be done prior to the final acceptance of our Part B re-application so that any changes could be incorporated in the permit. Please notify me if that is a possibility.

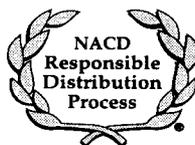

We are still requesting that all the changes listed in our permit re-application letter dated February 7, 1995 be approved.

If you have any questions, please call me at (505) 345-3655.

Thanks for you time and consideration of this matter.

WE CARE
