RE: Aisle space and room capacities

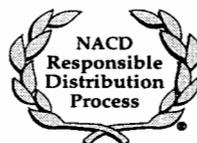

Dear Mr. Amindyas;

The following is the information that you requested for the aisle spaces within the rooms and the total capacities within the rooms. The main aisle spaces in the rooms for forklift activity are approximately ten (10') feet from yellow line to yellow line. The aisle space maintained for inspection of the waste are approximately twenty four (24") inches. The storage capacities within the rooms are as follows: Room A - 15,840 gallons, Room B - 15,840 gallons, Room C - 79,860 gallons, Room D - 73,900 gallons, Room E - 101,600 gallons and Room F - 81,800 gallons. These capacities are totals for each room. Note that these rooms could have product and waste both in same room. These totals were calculated by using the current floor plan and the current pallet spaces three levels high.

Should you have any questions regarding this information please contact me at (505) 998-4155. Thank You.
