RE: RCRA Facility Investigation (RFI) Report Modifications

Dear Mr Davis

Per your November 17, 1992 letter addressing the RFI Report for Landfills 1 and 2, and your November 20, 1992 letter addressing the RFI Report for Appendix I Solid Waste Management Units (SWMU's), you reference specific Administrative Control Requirements that must be met at certain sites before initiating a Class III permit modification. We understand these administrative controls to be the completion of a survey plat and the posting of warning signs marking the unit location.

Before we can begin posting warning signs at the designated sites, we need further guidance from your office as to specific requirements. What is required in the way of sign verbage? Type of sign per site? Number of signs per site? Amount of spacing between each sign? Do these requirements differ with differing sites, ie., Landfill, Fire Training Pit, Disposal Pit, Drainage Ditch?

Additionally, we are to begin taking action to intitiate Class III permit modifications to remove certain units from our permit. Could you please forward an example of an approved Class III permit modification for our use as a guide as we begin this lengthy process.

As always, I appreciate your cooperation and assistance in this matter. If you have any questions, please contact Mr. Jim Richards or Capt Mac Crawford at (505) 784-2739.

Sincerely

RICHARD N. GODDARD
