Dear Ms. Hoditschek

Cannon AFB recently received your meeting minutes titled "Comments of Meeting Held December 15, 1993 RCRA Facility Investigation Draft Work Plan for Landfill No. 5 (SWMU 113)", dated December 28, 1993. On page 5 of these minutes, under comment number 8, you requested that the ground water in well 113B be sampled for lead using EPA approved analytical method 239.2 within 30 days of receipt of these minutes. Due to problems encountered with securing the necessary funding for ground water monitoring, Cannon AFB will not be able to meet the 30-day deadline for this sampling event. However, the required funds have now been secured and the necessary arrangements have been made with our servicing agent. We have scheduled a ground water sampling event for the week of February 21, 1994. This sampling event will include your requested sampling for lead (EPA method 239.2 with 2 ppb detection limit) at monitor well 113 B.

Thank you, in advance, for your patience and understanding of our financial constraints.

Our point of contact on this issue is Mr. John F. Ekhoft at (505) 784-4639.

Sincerely

  
WILLIAM M. GUTH  
Brigadier General, USAF  
Commander
