DEPARTMENT OF THE AIR FORCE
27TH CIVIL ENGINEER SQUADRON (ACC)
CANNON AIR FORCE BASE NEW MEXICO

27 DEC 1999

Lt Colonel Eric J. Wilbur
Commander
506 N DL Ingram Blvd
Cannon AFB NM 88103-5136

4
DEC 2000
RECEIVED

Mr. James Bearzi
Hazardous and Radioactive Materials Bureau
New Mexico Environment Department
2044 Galisteo Street
P O Box 26110
Santa Fe NM 87502

(L)

Dear Mr. Bearzi

Enclosed for your information is our latest Management Action Plan.

If you have any questions, please contact Mr. Sanford Hutsell of my environmental flight at (505) 784-6378.

Sincerely

A handwritten signature in black ink, appearing to read "Eric J. Wilbur".

ERIC J. WILBUR, Lt Col, USAF

2-4 CURRENT ASSOCIATE GROUPS AND CONTRACTORS AT CANNON AFB	2-9
3. INSTALLATION-WIDE ENVIRONMENTAL PROGRAM STATUS	3-1
3.1 RESTORATION PROGRAM STATUS	3-1
3.1.1 Summary of Regulatory Agreements	3-1
3.1.2 Restoration Sites and Areas of Concern	3-12
3.2 RESTORATION-RELATED COMPLIANCE PROGRAM STATUS	3-16
3.2.1 Underground Storage Tanks	3-16
3.2.2 Solid Waste Management, PCBs, Other	3-16
3.3 STATUS OF COMMUNITY INVOLVEMENT	3-19
4. INSTALLATION-WIDE ENVIRONMENTAL PROGRAM STRATEGY	4-1
4.1 RESTORATION PROGRAM STRATEGY	4-1
4.1.1 Zone Designations	4-1
4.1.2 OU or Site Strategy	4-1
4.1.3 Ongoing and Planned Removal Actions	4-2
4.1.4 Community Involvement Strategy	4-2
4.1.5 Remedy Selection Approach	4-3
4.1.6 Remedy Selection Approach For Petroleum-Contaminated Soils	4-3
4.2 RESTORATION-RELATED COMPLIANCE STRATEGY	4-3
4.2.1 Underground Storage Tanks	4-4
4.2.2 Solid Waste, PCBs, Other	4-4
4.3 COMMUNITY INVOLVEMENT STRATEGY	4-4
4.4 RCRA COMPLIANCE STRATEGY	4-6
5. ENVIRONMENTAL PROGRAM MASTER SCHEDULE	5-1
5.1 ENVIRONMENTAL RESTORATION SCHEDULE	5-1
5.2 RESTORATION-RELATED COMPLIANCE SCHEDULE	5-4
5.3 PROJECT TEAM AND RESTORATION ADVISORY BOARD MEETING SCHEDULES	5-4

TABLE OF CONTENTS (Continued)

6. TECHNICAL AND OTHER ISSUES TO BE RESOLVED	6-1
6.1 DATA QUALITY	6-1
6.2 DATA INTEGRATION AND MANAGEMENT	6-1
6.2.1 Project Team Action Items	6-1
6.2.2 Rationale	6-1
6.2.3 Status/Strategy	6-2
6.3 CONCEPTUAL MODELS/DATA GAPS	6-3
6.3.1 Project Team Action Items	6-3
6.3.2 Rationale	6-3
6.3.3 Status/Strategy	6-4
6.4 BACKGROUND LEVELS	6-4
6.4.1 Project Team Action Items	6-4
6.4.2 Rationale	6-4
6.4.3 Status/Strategies	6-4
6.5 RISK ASSESSMENT PROTOCOLS, FUTURE LAND USE, AND CLEANUP STANDARDS	6-5
6.6 RELATIVE RISK EVALUATION	6-5
6.7 CONTRACTING STRATEGY	6-5

APPENDICES

- APPENDIX A: FISCAL YEAR FUNDING REQUIREMENTS/COSTS
- APPENDIX B: INSTALLATION ENVIRONMENTAL RESTORATION DELIVERABLES
- APPENDIX C: SUMMARIES FOR CLEANUP
- APPENDIX D: NO FURTHER RESPONSE ACTIONS PLANNED (NFRAP) SUMMARIES
- APPENDIX E: RESERVED
- APPENDIX F: ESTIMATED IRP COSTS BY PROJECT NUMBER
- APPENDIX G: THIS PAGE INTENTIONALLY LEFT BLANK
- APPENDIX H: THIS PAGE INTENTIONALLY LEFT BLANK
- APPENDIX I: THIS PAGE INTENTIONALLY LEFT BLANK
- APPENDIX J: THIS PAGE INTENTIONALLY LEFT BLANK
- APPENDIX K: ACTIVE PROJECT SUMMARIES
- APPENDIX L: INSTALLATION IRP SITE MAPS
- APPENDIX M: IRP SITE TIMELINES WITH COSTS BY TASKS
- APPENDIX N, O, P, Q: RESERVED FOR CANNON AFB
- APPENDIX R: RELATIVE RISK INFORMATION
- APPENDIX S: SITE STATUS SUMMARY SHEETS

1. INTRODUCTION

Cannon Air Force Base has contaminated areas due to past practices in management of waste, hazardous wastes and compounds, and resource handling. Various Environmental efforts are now in place at Cannon Air Force Base (AFB) (hereafter referred to as the Base) as a response to identify and remediate the contamination. Applicable laws and regulations are being complied with by the Base and are reflected in current waste and resource management practices as practiced by the Air Force, tenant units and as a requirement of future property lessees. Management practices governed by regulation compliance will continue to protect human health and the environment during daily operations at the Base.

This Management Action Plan (MAP) has a two-fold purpose. First, it summarizes the current status of the Base environmental program. Second, it presents a comprehensive strategy for implementing the proper actions necessary to protect human health and the environment. This strategy integrates activities under the Installation Restoration Program (IRP) that support restoration of the base. This information is compiled in this format to be accessible to the public and base personnel. The MAP is a dynamic document that will be updated regularly with new information and reflect the completion or change in status of remedial actions (RAs). Site specific information is located in Appendix A. This MAP was prepared with information available as of December 1999.

In light of the ever changing nature of environmental projects this MAP is intended as a planning document only. Information, schedules, and remedial actions presented in this MAP do not necessarily represent those that have been or will be approved by the Air Force or federal and state regulatory agencies. It was necessary to make certain assumptions and interpretations to develop the estimates. As additional data become available, implementation programs and cost estimates could be dramatically altered. Such changes will be reflected in future updates to the MAP.

Chapter 1 summarizes the objectives of the environmental restoration program; introduces the MAP and Project Team; and provides an operations history that led to the contamination.

Chapter 2 summarizes the environmental condition of the installation's property with emphasis on the adequacy of previous efforts for source discovery and assessment of existing conditions. It also identifies any off-base property associated with operations at the installation.

Chapter 3 summarizes the present status of the installation's environmental restoration program, including restoration projects related to environmental compliance issues, and community involvement efforts. Summarizes information on all IRP sites, areas of concern (AOC's), zones and/or operable units.

Chapter 4 presents strategies and plans for completing the environmental restoration program. Describes management strategies and projects for investigating and remediating contamination, and summarizes remedy selection and community involvement strategies. Presents plans for specific problem areas and their sources by complying with specific programs such as the underground storage tank (UST) program for example.

Chapter 5 presents a schedule for restoration and restoration-related projects and identifies dates and issues for upcoming Project Team meetings.

Chapter 6 identifies key program issues to be addressed by the Project Team for implementation. Each program issue has an action item presented and its status is summarized.

The six main chapters of the MAP are followed by these appendices;

Appendix A presents historical program costs and future year program costs to meet fiscal year guidance.

Appendix B summarizes contractor deliverables by site and project for the environmental restoration program.

Appendix C summarizes remedy selection decisions for sites or projects.

Appendix D summarizes no further response action planned decisions for sites or projects.

Appendix E provides conceptual model data summaries for key sites, zones, or operable units.

1.1 ENVIRONMENTAL RESPONSE OBJECTIVES

- The objectives of the Cannon AFB environmental restoration program are as follows:
- Protect human health and the environment;
- Comply with existing statutes and regulations;
- Meet Cannon AFB's RCRA Hazardous Waste Storage Permit deadlines and/or commitments in other agreements;
- Complete Remedial Investigations (RIs) and/or RFIs as soon as practicable for each IRP/Solid Waste Management Unit (SWMU) site, in order of priority as specified in the Hazardous and Solid Waste Amendments of 1984 (HSWA) Permit Appendices;
- Continue efforts to identify all potential source areas;
- Provide an accurate inventory of the environmental condition of base property (which identifies all potential sites and establishes areas of no suspected contamination, assisted by a restoration Geographic Information System);
- Initiate removal actions where necessary to control, eliminate, or reduce risks to manageable levels;
- Characterize risks associated with releases of hazardous substances, pollutants, contaminants, or hazardous wastes;
- Develop, screen, and select RAs that reduce risks in a manner consistent with statutory requirements;
- Commence RAs as soon as practicable;
- Conduct long-term groundwater monitoring and RAs; and
- Conduct appropriate modifications of the RCRA HSWA permit to have all IRP/SWMUs listed from the permit.

1.2 MAP PURPOSE, UPDATES, AND DISTRIBUTION

This MAP summarizes the status of Cannon AFB's environmental restoration program and presents a comprehensive long-range strategy, plans, and schedules to implement program objectives. It also defines the status of the current effort to resolve scientific and technical issues so that continued progress and implementation of scheduled activities can occur.

The Cannon AFB Project Team will use this MAP to direct and monitor environmental response actions and to schedule activities needed to resolve technical, administrative, and operational issues. This MAP is updated informally on an ongoing basis at the base level and once a year at the headquarters level. Copies of the Cannon AFB MAP will be distributed to the Project Team after every update. The annual update of the Cannon AFB MAP will be distributed to the Environmental Leadership Committee (ELC), RAB, and Headquarters (HQ) USAF.

1.3 PROJECT TEAM AND RESTORATION ADVISORY BOARD

The USAF maintains primary responsibility for conducting restoration and restoration-related compliance investigations and cleanups at Cannon AFB. The U.S. Environmental Protection Agency (EPA) Region VI (Dallas, Texas) and the New Mexico Environmental Department (NMED) provide oversight to the USAF in restoration decision-making processes. For most IRP sites, these actions are being conducted in a manner consistent with RCRA. Funding is provided by the U.S. Department of Defense (DoD) through the DERA and the Environmental Compliance Program (ECP) account.

The Environmental Flight Chief manages the environmental program at Cannon AFB. The 27 CE is part of the 27 Support Group (27 SPTG), under the 27 Fighter Wing (27 FW). Currently, 27 CEV has 30 full-time employees, including 22 civilian and 8 military personnel. It has the primary responsibility to maintain environmental compliance with federal, state, local, DoD, and USAF laws and regulations. 27 CEV has formed a project team to accomplish the goals of Cannon AFB's environmental restoration programs.

The Cannon AFB Project Team is comprised of a core group and associate members. The Project Team is led by the base Remedial Project Manager (RPM) from 27 CEV. In addition to the base RPM, other core team members include representatives from HQ Air Combat Command (ACC), EPA Region VI, and the NMED. The core Project Team meets on an as-needed basis to address and resolve base restoration issues. Table 1-1 lists the current Project Team members and specifies their roles and responsibilities.

Topics of discussion and procedures for team members can include the following:

- Maintaining communication among all team members on an as-needed basis for review and discussion of the progress of work being performed at the Base. Communication may include correspondence, telephone conferences, and, if necessary, formal meetings.
- Preparing periodic summaries from the RPM of the status of the environmental restoration work at the Base and distributing them to other team members.
- Communicating through telephone conferences among team members the status of the work being conducted.
- Discussing issues related to the progress of the work being performed.
- Providing approval of minor modifications to the work being performed.
- Documenting teleconferences and, when necessary, following up in writing to all team members.

Associate members include representatives from four Cannon AFB offices: (1) the CEV office, (2) the Judge Advocate office, (3) the Bioenvironmental Engineering office, and (4) the Public Affairs office. Other associate members include the RCRA Facility Investigation (RFI)

contractor, Defense and State Memorandum of Agreement contacts, and the ELC and RAB members. Associate Project Team members are consulted when their areas of expertise are required.

The Cannon AFB ELC was established to keep the Major Command updated on the entire environmental program at the Base. The ELC meets to discuss all environmental programs, including the IRP. Table 1-2A provides a list of the primary ELC members. The Cannon AFB RAB was established in August 1995 to provide a forum for the exchange of information between the Base and the community. It is composed of USAF and community members that meet regularly to review and comment on technical documents and proposed RAs. Table 1-2 provides a list of the primary RAB members.

1.4 BRIEF HISTORY OF INSTALLATION AND LAND USE

1.4.1 Installation History

Figure 1-1 shows the location of Cannon AFB in Clovis, New Mexico, and Table 1-3 outlines the Base's operational history. Figure 1-2 provides the approximate locations of past hazardous substance and petroleum activities as presented in Table 1-3.

The land the Base currently occupies was originally farmland. In 1929 Portair Field was established as a transcontinental flight civilian air terminal. The DoD took control of Portair Field in 1942 and renamed it Clovis Army Air Base. In its early years as an Army Air Base it

provided training facilities for B-17, B-24, and B-29 air crews during World War II. The Base was deactivated in 1947.

In 1951, the Air Base was reassigned to the Tactical Air Command and reactivated as Clovis AFB, operating P-51s and F-86s. The Base was renamed Cannon AFB in 1957 and operated F-100s. Since 1971, the primary mission of the Base has been to develop and maintain tactical fighter wings composed of various models of the F/EF-111 aircraft. Cannon AFB was reassigned to the ACC on 1 June 1992. In 1995, Cannon AFB began transitioning from F/EF-111 aircraft to F-16 aircraft.

The mission of Cannon AFB is to maintain a combat-ready force capable of day, night, and all-weather operations and to provide replacement training of combat aircrews for tactical organizations worldwide. To support this mission, quantities of petroleum, oils, and lubricants (POL) as well as solvents and protective coatings are used, resulting in waste generation.

The main Base covers approximately 3782 acres (Figure 1-2). Open farmland borders the Base in every direction. Most of the Base is bounded to the north by U.S. Highway 60/84, with the exception of the Chaves Manor Housing Area located north of 60/84. Residences are scattered along the highway in the vicinity of the Base (Figure 1-3).

1.4.2 Current and Future Land Use

Land uses at Cannon AFB are categorized into 11 functional classes and are described in the most recent Cannon AFB *Commander's Long Range Facility Improvement Plan* (Cannon AFB, 1993).

- **Community:** Land use areas designated for commercial activities, club facilities, indoor recreation, and community services.
- **Administrative:** Land use areas reserved for administrative functions.
- **Housing:** Accompanied and unaccompanied temporary and permanent housing areas.
- **Dormitory:** Unaccompanied housing for unmarried enlisted personnel
- **Industrial:** Land use areas for maintenance, storage, and supply functions not directly related to aircraft.
- **Mission:** Land use areas directly related to the operation, maintenance, and training of aircraft and their crews.
- **Medical:** Land use areas occupied by hospitals, dental clinics, and veterinarian facilities.
- **Outdoor Recreation:** Land use areas designated for outdoor recreation.
- **Open Space:** Conservation areas, wetlands, undeveloped land, and required buffer space (i.e., safety clearances, security areas, utility easements, and environmentally sensitive areas).
- **Airfield:** Active and inactive runways, taxiways, and parking aprons.
- **Special Interest:** Areas which receive enhanced architectural and/or landscaping treatment such as entrance gates.

Current land use at Cannon AFB is shown on Figure 1-6. Currently, open space, airfields, and air field pavements comprise the greatest percentage of total land area at the Base. Other minor land

uses at the Base include housing, outdoor recreation, aircraft operation and maintenance, commercial, administrative, community services, and medical facilities. Planned future land uses at the Base are summarized in Figure 1-7 and discussed in detail in the current Cannon AFB Base Comprehensive Plan (BCP). Figure 1-3 presents the current land use of off-base property surrounding the Cannon AFB boundary. All of this land is shown to be utilized for agricultural purposes, primarily for cattle and crops grown for cattle feed.
