PUBLIC NOTICE 11-02

**NEW MEXICO
ENVIRONMENT DEPARTMENT
HAZARDOUS WASTE BUREAU
SANTA FE, NEW MEXICO 87505
March 23, 2011**

On March 10, 2011, the Department of Public Safety (DPS) informed the New Mexico Environment Department (NMED) that it had an emergency involving unstable hazardous waste and requested that the NMED issue it an emergency permit to treat the waste by detonation. DPS's explosives experts had determined that the unstable waste posed an imminent and significant health and safety risk and was unsafe to transport on or across civilian motorways.

Based on all information provided and after considering the inherent dangers associated with handling the unstable materials, NMED approved an emergency permit for DPS to destroy the above noted items pursuant to 20.4.1.900 NMAC, incorporating 40 CFR 270.61. DPS must also properly dispose of any hazardous residues that remain after the destruction of the waste.

The unstable waste consisted of seven boxes, each containing 40 pounds of unstable flash powder. The DPS explosives disposal team detonated the waste in place at the Roswell Industrial Air Center on March 15, 2011 and implemented all necessary safety precautions.

On March 21, 2011, Canon Air Force Base (CAFB) informed the New Mexico Environment Department (NMED) that it had an emergency involving unstable hazardous waste and requested that the NMED issue it an emergency permit to treat the waste by detonation. CAFB's explosives experts had determined that the unstable waste posed an imminent and significant health and safety risk and was unsafe to transport on or across civilian motorways.

Based on all information provided and after considering the inherent dangers associated with handling the unstable materials, NMED approved an emergency permit for CAFB to destroy the above noted items pursuant to 20.4.1.900 NMAC, incorporating 40 CFR 270.61. CAFB must also properly dispose of any hazardous residues that remain after the destruction of the waste.

The unstable waste consisted of 12 one pound blocks of "swearing" dynamite. The CAFB explosives disposal team detonated the waste at the Explosive Ordinance Disposal Proficiency Range on March 21, 2011 at approximately 5:30 PM, and implemented all necessary safety precautions.
