RECEIVED

NOV 21 2016

Mr. John E. Keiling  
Chief, Hazardous Waste Bureau  
New Mexico Environment Department  
2905 Rodeo Park Drive East Bldg 1  
Santa Fe NM 87505-6063

NMED  
Hazardous Waste Bureau

Dear Mr. Keiling

In partnership with the New Mexico Environment Department, and in accordance with the Cannon Air Force Base Hazardous Waste Facility Permit, Section 2.2.1: The 27th Special Operations Mission Support Group would like to notify you of a recent solid waste discovery. On 7 Nov 2016, the 27th Special Operations Civil Engineer Squadron was notified of a suspected solid waste discovery by a construction contractor excavating for placement of underground electrical distribution line. The location and details of the discovery can be found at Attachment 1. The 27th Special Operations Contracting Squadron halted all construction and took immediate control measures to contain the debris. The debris has not been removed off site and will be placed back in the ground. During this time the 27th Special Operations Aerospace Medicine Squadron surveyed the area for suspect volatile organic compounds and evidence of radiological contamination and found no contamination concentration levels of concern. 27th Special Operations Civil Engineer Squadron Environmental Element will continue to work with the New Mexico Environment Department in effort to further characterize the solid waste discovery and implement the proper corrective actions as necessary.

If you have any questions regarding this notification, please contact Mr. Ronald A. Lancaster, Chief, Installation Management at (575) 784-1146.

Sincerely

DIANE C. SULLIVAN, Lt Col, USAF

### Description of Solid Waste Discovery:

The portion of excavation exposing suspected solid waste is approximately; 4 feet deep by 10 feet in diameter, yielding approximately 2 cubic yards of soils and debris.

Upon visual inspection, the debris consists of, but may not be limited to; various legacy scrap metal from vehicles and equipment.
