How was information obtained? site visit _____ inspection letter _____

Comments: James: Art advised me to upgrade this generator to a SQG from a CESQG based on the monthly generation status fluctuating in and out of a CESQG and SQG. The business was moving the waste directly offsite from their gun cleaning paint-related waste process and not storing any waste except for one or two 30-gallon drums at the SAA. However, they weren't taking advantage of the CESQG storage limits of less than 2200 pounds, etc. onsite at any given time.
