ATTENTION OF:

ATZC-DOE (200)

MEMORANDUM FOR: New Mexico Environmental Department
Hazardous Waste Bureau
2905 Rodeo Park Drive East, Building 1
PO Box 26110
Santa Fe, New Mexico 87505
Attention: Mr. Glenn vonGonten, Program Manager

SUBJECT: RI/FS Work Plan for Three New Mexico Landfills, SWMUs # 18, 27, & 29, EPA/NM RCRA Permit # 4213720101, United States Army Air Defense Artillery Center, and Fort Bliss

1. Attached please find:
 - a. *Additional Investigations for FTBL-013/SWMU-18, FTBL-012/SWMU27, FTBL-011/SWMU-29 at Fort Bliss Military Reservation, New Mexico*, Malcolm Pirnie, Inc., July 2001
 - b. *RCRA Facility Investigation for Five Solid Waste management Units Fort Bliss, Texas and New Mexico*. Thompson Professional Group, Inc. July 1997
 - c. *EPA Region 6 Risk Assessment Program, Human Health Medium – Specific Screening Levels*. USEPA, Region 6 Multimedia Planning and Permitting division, July 12 1999 (in back of reference 1.a. above)
 - d. *Historical Review Report*. J.K. Wagner, Inc. August 2000
 - e. *Submittal of Final RFI Report for Solid Waste Management Units 19, 25B, 27B, and 76*. Roy F. Weston, Inc. May 1997
 - f. *Subsurface Investigation of the New Mexico Oxidation Lagoons (SWMU Nos. 19, 25B, and 27B)*. Tetra Tech EM, Inc. San Francisco, CA, July 1998
2. Together these six documents make up the work plan to complete the investigation of the three New Mexico Fort Bliss Range Camp Landfills. The fourth landfill, FTBL-014, SWMU 25, is not part of this package as it is not part of the Installation Restoration Program as are the first three. It is anticipated however, that the final approved version of this work plan will be used as a pattern by the Solid Waste Program Manager, Directorate Of Environment, Fort Bliss to complete the investigation of SWMU 25. The work on SWMU 25 is contingent of course on future funding and priority ranking of non- IRP environmental projects.
3. It is our intention to brief the highlights of this work plan to you at our Tuesday, 24 July 2001 meeting. We feel this is reasonable as the work plan activities and design has been discussed with you at several previous meetings.

4. If you have any questions, please contact me at 915-568-7979. I have taken the liberty to include a hard copy of the approved FY 01 Installation Action Plan (which is stuck loose in the back of reference 1.a above.

Sincerely,

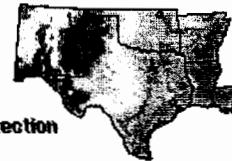

David Dodge
Engineering and Environment, Inc.
IRP Project Manager

Multimedia Planning and Permitting Division

Risk Assessment Program

OVERVIEW

The Region 6 RCRA Risk Assessment Team provides technical assistance in the areas of toxicological document review, risk calculation, risk assessment training and guidance on state-of-the-art science.

1. The Region 6 Multimedia Planning and Permitting Division is developing a new Risk Management Strategy for the Corrective Action Program that is designed to expedite cleanups at facilities where releases have occurred through risk-based priority screen.
2. Developing a risk-based approach to delisting of Subtitle C hazardous waste

A tiered approach to risk-based decision-making for the delisting of Subtitle C waste is under development. The tiered process begins by comparing waste constituent concentrations against health-based screening levels using conservative waste volume and exposure assumptions. The second tier uses waste volume-specific data to calculate cumulative risk to multiple exposure pathways, providing a more accurate risk analysis of the petitioned waste. This risk-based approach combines state-of-the-art fate and transport modeling (EPACMTP groundwater model) and standardized exposure assessment methods in a spreadsheet format to simplify the risk assessment process.

For information on the risk-based process, please contact:

Dr. Michael Morton
OK/TX RCRA Permits Section (6PD-O)
Multimedia Planning and Permitting Division
1445 Ross Avenue
Dallas, Texas 75202
(214)665-7393 or E-Mail Address: E-Mail:

3. Developing human health and ecological combustion risk assessment guidance

The Region 6 Risk Assessment Team is updating guidance for assessing the risk of combustion emissions to human health and the environment.

environment. There is sufficient guidance available regarding the performance of direct inhalation risk assessments, indirect risk assessments are newer and more complex. As a result, the new guidance document for human health risk assessments describes the evaluation of direct inhalation risk, but primarily focuses on the procedures used to estimate risk resulting from indirect pathways. The new guidance is titled Human Health Risk Assessment Protocol for Hazardous Waste Combustion Facilities and is available for review and download. Also available is an additional document entitled, Region 6 Risk Management Addendum - Draft Human Health Risk Assessment Protocol for Hazardous Waste Combustion Facilities which provides specific risk management guidance to combustion facilities located in Region 6. Detailed guidance on the methods and procedures required to complete screening level combustion risk assessment for ecological receptors has not been presented prior to the development of the new ecological risk assessment guidance. The new ecological risk assessment is titled Screening Level Ecological Risk Assessment Protocol for Hazardous Waste Combustion Facilities.

For information on the above document, please contact:

Jeff Yurk
OK/TX RCRA Permits Section (6PD-O)
Multimedia Planning and Permitting Division
1445 Ross Avenue
Dallas, Texas 75202
(214)665-8309 or E-Mail Address: E-Mail:

4. Additional Studies and Reports Related to Combustion Risk Assessment

- o Model Parameter Sensitivity Analysis (Sensitivity Analysis of ISCST3 input parameters)
 - Volume 1 Results
 - Volume 2 Appendices
 - Appendix A - Table of Absolute and Normalized Element Study Results:
 - Part1
 - Part2
 - Appendix B - Printouts of ISCST3 Model Inputs
- o Suggestions for Auditing Assessment Air Modeling Studies following the 1998 U.S. Office of Solid Waste Human Health and Ecological Risk Assessment Protocols. (pdf format)
- o Mercury Fate and Transport: Example Calculation (pdf format)

Due to comments received by U.S. EPA Region 6 concerning the difficulty in interpreting information presented in its External Peer Review Draft of the Human Health Risk Assessment Protocol for Hazardous Waste Burning Combustion Facilities (U.S. EPA 1998), U.S. EPA Region 6 has developed the following example calculation which is intended to illustrate mercury speciation, fate and transport starting from air model outputs through the risk calculation to the consumption of fish exposure pathway in the adult subsistence fisher exposure scenario.

5. Human Health Medium Specific Screening Levels

The revised media specific human health screening values for evaluating contaminated hazardous waste sites are now available on the Internet. The Regional tables are frequently requested and provide information on levels of contamination in the soil, air, and/or water that may be of concern for human health. Two files can be downloaded, a WordPerfect file that explains the regional and equations used to derive the screening values, and an Excel file that provides the screening values, the toxicity factors,

physical-chemical data, and the pathway specific values. All of the text or screening values can either be viewed or downloaded.

For information on the above document, please contact :

Cheryl Overstreet
NM/Federal Facilities Section
Base Closure Team (6PD-NB)

6. Performed a screening combustion risk assessment in Midlothian, Texas

o **Cumulative Risk Assessment**

The U.S. Environmental Protection Agency (EPA) also conducted a multi-source, multi-pathway Midlothian Texas Assessment that estimates the cancer risk and potential non-cancer health effects associated with emissions from Central Steel Company, North Texas Cement Company, Texas Industries, and Holnam Texas, L.P.

o **Animal Health Survey (Midlothian, Texas)**

This document results from a voluntary survey of ranchers in the vicinity of Midlothian, Texas. A study area was chosen in two control areas to determine if scientifically valid evidence exists that would indicate an unusual increase in adverse health problems for locally raised animals.

o For a copy of the Animal Health Survey, please contact:

Stan Burger
OK/TX RCRA Permits Section (6PD-A)
Multimedia Planning and Permitting Division
