**Subject:** Re: FW: Submunitions Letter

Larry,

I have some questions regarding the letter that you forwarded to me (i.e., HQDA Ltr. 385-01-1, dated March 2, 2001, regarding "Improved Conventional Munitions and Submunitions").

1. Can you provide me with a list of the specific ordnance items (ICMs and submunitions) that are covered by this letter? Would that list be in one of the references? If so, could you provide me with a copy?
2. Which specific ordnance items that have been found at FWDA are subject to this letter?
3. Do the requirements in the letter apply to the Kickout Area surrounding the OB/OD Area at Fort Wingate or do they only apply to the OB/OD Area?
4. Do the requirements in the letter apply to the Kickout Area that is within Parcel 2 which is being used by BMDO?
5. Do the requirements in this letter apply to the Kickout Area that lies beyond the facility boundary to the west of the OB/OD Area?
6. The Policy (section 7.c.) states that "Ranges or other areas known or suspected of containing ICMs or submunitions will be clearly marked at the physical location and on installation master plans to identify the hazard. Entry to such areas will be restricted and access controlled".
  - 6.a. How will these areas be physically "clearly marked to identify the hazard"? What will the signs say? What languages will be used? Where will the signs be placed and what will be the spacing?
  - 6.b. Will areas that potentially contain these items be clearly marked on the Installation Utilization Map for FWDA?
  - 6.c. How will the areas be restricted?
  - 6.d. How will access be controlled?
7. Who is working on the waiver?
8. Can I get a copy of the waiver after it is submitted?

Thanks!

Julie
