Subject: Monthly Progress Report 8
General Electric Consent Decree
Civil Action No. 87-1073-jb

Percentage of RFI Workplan completed <10%.

The City of Albuquerque Environmental Health Department was contacted by telephone and informed of the impending RCRA Facility Investigation activities.

Cleaning of the interior surfaces and equipment of the building was performed between February 19, and March 5 . Approximately 40 wipe samples were obtained from building and equipment surfaces and sent for PCB analysis.

The boring adjacent to the former drywell was performed between February 23, and 24, with the boring terminated at a depth of 49 feet. Field screening with an on-site gas chromatograph did not detect any constituents at samples obtained at 37 to 39 feet, 42 to 44 feet, and 47 to 49 feet. Methylene chloride was detected at less than 10 ppb concentration by overnight laboratory analysis in the sample obtained from 37 to 39 feet.

The drill rig and required associated equipment were mobilized on the site and drilling to install the piezometers started on March 6.

Planned activities for the next reporting period include the following:

Evaluate analyses results from wipe samples from Interim Measures activities.

Evaluate constituent analyses from boring adjacent to former dry well.

Complete the installation of piezometers.

Very truly yours,

Barry York
