**RE: DRAFT CORRECTIVE MEASURES IMPLEMENTATION REPORT, FORMER
GE APPARATUS SERVICE CENTER, ALBUQUERQUE, NM, APRIL 2006
GE ENERGY
GENERAL ELECTRIC, EPA ID# NMD047140256
HWB-GE-06-001**

Dear Mr. Antonoff:

The New Mexico Environment Department (NMED) has reviewed the subject document. The draft report appears to be adequate except for supplemental information on the monitor wells installed at the site. However, you should be aware that U. S. Environmental Protection Agency (EPA) may have comments or concerns that will be addressed in separate correspondence.

Prior to NMED issuing a Certificate of Completion for Corrective Action Complete (CAC) for the Former GE Apparatus Service Center, 4420 McLeod NE, Albuquerque, New Mexico the four (4) monitor wells installed at the site shall be properly plugged and abandoned. Therefore, GE Energy shall submit a work plan to NMED within ninety (90) days to plug and abandon the monitor wells.

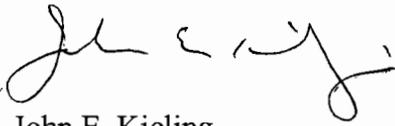

After the completion of the above scope of work, GE Energy should submit a final Corrective Measures Implementation Report including information on the plug and abandonment of the monitor wells.

Mr. Antonoff
August 2, 2006

Finally, NMED and EPA are considering subjecting the results of the corrective measure implementation to public comment. A decision on the implementation of a public comment period will be discussed between EPA and NMED.

If you have any questions regarding this matter, please contact Mr. Brian L. Salem of my staff at (505) 222-9576.

Sincerely,

John E. Kieling
Manager
Permits Management Program
