Santa Fe, New Mexico 87503

1. This is to document a telephone conversation, held on 17 May 1990, between yourself and Sharon Moore of Holloman Air Force Base with regard to the Defense Reutilization and Marketing Office (DRMO) hazardous waste storage facility.
2. The base will continue to utilize the existing facility for the purposes of hazardous waste storage until Headquarters Defense Logistics Agency (DLA) in Battle Creek, Michigan, funds the construction of a new facility. It is anticipated the facility will be funded in FY 1992-1993 timeframe. The base has recently been informed that DLA has this proposed facility 90% designed. The base will provide the drawings for the proposed facility should the NMEID desire to have copies. The base will request from the NMEID the Part B be modified to reflect the new facility when constructed.
3. Until such time as a new facility is constructed, drip pans will be installed, both inside and outside, in all areas of hazardous waste storage to ensure compliance with secondary containment requirements.
4. The point of contact for this is Sharon Moore at 479-3931.

HOWARD E. MOFFITT
Deputy Base Civil Engineer

cc: Ch Polluck, DRMO/YDM
