MEMORANDUM

TO: FILE

FROM: STEPHANIE STODDARD *SS*

RE: 11 AUGUST 92 NOTIFICATION OF DISCHARGE *and Emer Permit*

DATE: AUGUST 17, 1992

I called HAFB and spoke with Warren Neff (Roger Wilkson is TDY) regarding the above memo. The memo indicates that the soil was excavated to a depth of visible contamination. This is in violation of the emergency permit which requires an assessment by soil gas survey of the horizontal and vertical extent of the contamination prior to excavation. Warren Neff informed me that he thought that the soil gas survey had been done, but that he had to contact the contractor responsible for the spill and remediation. I requested an informal report regarding the S-G survey conducted showing a map of the sample points and "what they found out" at the site.
