SUBJ: Annual RCRA Groundwater Monitoring Report Due Date

TO: Mr Steve Alexander
Hazardous & Radioactive Materials Bureau
New Mexico Environment Dept
525 Camino de Los Marquez
Santa Fe, New Mexico 87502-6610

1. This letter is in reponse to a 25 Feb 1993 phone conversation between you and our Dr Fred M Fisher regarding the due date for the annual RCRA groundwater monitoring report. Holloman AFB requests an extension of the due date for the report from 1 March 1993 to 8 Mar 1993. We are unable to meet the 1 March deadline because of work activities being performed in preparation for the installation of new groundwater monitoring wells during March 1993. These activities include the development of procedures for handling investigation derived wastes and preparation of a Notice of Intent to discharge for submittal to the Ground Water Bureau.

2. The point of contact for this issue is Dr Fred M Fisher, 505 479-3931.

HOWARD E. MOFFITT
Deputy Base Civil Engineer
