III. SUMMARY OF FINDINGS.

Groundwater discharge permits are being submitted in support of the rapid response action at the T-38 Test Cell (SWMU 229). Upon approval, field activities will continue with construction of the enhanced vapor extraction system.

Interim remedial actions were completed at the Acid Trailer Burial Site, SWMU 102. Various debris was removed from the site in order to remove the remaining safety hazard posed by the site.

Preliminary work has been initiated on the Phase 2 Table 1 RCRA Facility Investigation (RFI). Field work is scheduled for completion in late August.

Field work was completed for the Table 2 RFI. A report is anticipated in late May.
