Mr. Howard E. Moffitt
Deputy Base Civil Engineer
49 CES/CEVR
550 Tabosa Ave.
Holloman Air Force Base, NM 88330-8458

Dear Mr. Moffitt:

NMED concurs with plans outlined in your letter of 25 March 1994 for Holloman Air Force EOD personnel to thermally treat suspected picric acid or similar reactive materials found at Site OT-4 (the Acid Trailer Burial Site) with plastic explosives on site. We appreciate your advising us of this situation. Please contact either myself at 505-827-2754 or Coby Muckelroy at 505-827-4308 if any further questions arise.

Sincerely,

David Morgan
NMED DSMOA group
