### III. SUMMARY OF FINDINGS.

Groundwater discharge permits submitted in support of the rapid response action at the T-38 Test Cell (SWMU 229) are still being reviewed by the New Mexico Environment Department (NMED), Groundwater Protection & Remediation Bureau. Upon approval, field activities will continue with construction of the enhanced vapor extraction system.

The draft IRA report for SWMU 102, the Acid Trailer Burial Site, is currently under review by Holloman and USACE personnel. The draft final is scheduled for submittal to EPA Region 6 in August 1994.

The draft Corrective Measures Study (CMS) Workplan for SWMUs 229 and 230 was submitted to EPA Region 6 in June 1994. Upon approval of the workplan, work on the CMS will be initiated.

Preliminary work has been initiated on the Phase 2 Table 1 RCRA Facility Investigation (RFI). Field work has been delayed due to contracting difficulties, but is scheduled to begin in August or September 1994.

Review of the pre-draft Table 2 RFI Report by Holloman and USACE personnel was completed in June. The draft final report is scheduled for submittal to EPA Region 6 in August 1994.

The draft final Table 3 RFI Workplan was submitted to EPA Region 6 in May. Field work is scheduled to begin in August or September 1994.
