

MEMORANDUM

TO: The Files  
FROM: Stephanie Kruse  
SUBJECT: HAFB sewage lagoons  
DATE: January 19, 1995

Fred Fisher, HAFB, called on 1/17/95 to explain why we haven't received the Progress Assessment Report (PAR), due 1/1/95. He is reviewing it now. Fred thinks it needs reworking. He has not talked to Radian yet. He will call with a new due date when he gets one.

Fred thinks this will provide us with a good historical/explanatory document and wants to get it right. This document will include a history of investigations to date. It will also include references to actual data submittals, thus facilitating review of the ground water monitoring plan and enabling us to make the connection between the Appendix VIII sampling for the lagoons and Holloman's current list of parameters of concern. This need to be done before submittal of the closure plan for the lagoons.

N.b.: Presumably, the delay in submittal of the PAR means a similar delay in submittal of the closure plan, currently scheduled for February.
