MEMORANDUM FOR NEW MEXICO ENVIRONMENT DEPARTMENT
Hazardous and Radioactive Materials Bureau
Attn: Barbara Hodischek
525 Camino De Los Marquez
P.O. Box 26110
Santa Fe, NM 87502

FROM: 49 CES/CEV
550 Tabosa Ave
Holloman AFB, NM 88330-8458

SUBJECT: Building 1080 and Hensel Phelps Spill Sites

1. This is in response to your 20 Feb 95 letter on the subject spill sites. We appreciate your timely response to our last submittal and are pleased to see the sampling and analysis plan has been approved.

2. Holloman will, at your request, sample the additional soil samples at the building 1080 spill site. This will include seven sample locations with one Quality Control (QC) sample. Additionally, Holloman proposes to sample in eight locations at the Hensel Phelps spill site (Atch 1). The total length of the spill was approximately 385 ft. The eight locations will be divided evenly throughout and taken along the fence line. One QC sample will be taken.

3. Our proposed schedule is as follows:
- a. Field Sampling 13 Mar 95
 - b. Sample Results due 22 Mar 95
 - c. Transmittal letter 29 Mar 95

Field sampling will be conducted with in-house personnel. Samples will be sent to Assaigai Labs in Albuquerque with a seven-day turnaround. Sample results will be provided via letter to your office dated by 29 Mar 95.

4. HAFB hopes this will satisfy your requirement of additional sampling. We would like to sample these as soon as possible. Therefore, if there are any problems with the Hensel Phelps area sampling, please contact the point of contact by phone before 13 March 95. The POC is Cathy Giblin at (505)475-5040.

HOWARD E. MOFFITT

Deputy Base Civil Engineer
