Edit Descriptions

Calculate the absolute value of the difference between:

- The sum of the quantity of waste generated on Form GM, Section II, subsection B (BRS variable GEN_QTY) in tons across all GM forms with origin code 5 (Form GM, Section I, subsection E) and the same origin system type (Form GM, Section I, subsection E); and
- The RCRA Solid/Sludge residual quantity (Form PS, Section II, subsection D, BRS variable SR_QTY_RCRA) in tons on each Form PS with the same system type as the origin system type on Form GM.

This absolute value must be less than 5.

- and -

The RCRA Solid/Sludge residual quantity from Form PS must be within +/- 5% of the sum of the generated quantities from Form GM. (Edit may not be valid when multiple PS forms are present for the system type identified.)
