Santa Fe, New Mexico 87502

**SUBJECT: Certification Letter for the Construction of the
20,000-pound Open Detonation (OD) Unit at Holloman Air Force Base**

Dear Dr. Kelley:

On 14 May 1997, a Professional Engineer inspected the 20,000-pound OD Unit at Holloman Air Force Base (HAFB). The purpose of the inspection was to determine whether the unit meets the construction criteria specified in the RCRA permit for the unit (EPA ID Number: NM6572124422).

Enclosed is a letter certified by Doug Bell, the Professional Engineer who inspected the unit. The letter certifies that the unit is in compliance with the construction criteria specified by the permit.

Please do not hesitate to call me at (505) 475-3931 if you have any questions.

Sincerely,

John Poland, CHMM
Environmental Flight Chief
