SUBJECT: Compliance Agreement Quarterly Report – No. 43

1. Pursuant to the requirements set forth in Section X--REPORTING AND EXTENSIONS section of the Compliance Agreement signed on 20 December 1988, we hereby submit the 43rd Quarterly Progress Report. Events during the past quarter are described below.
2. The final closure report and the deed notification were submitted to the New Mexico Environment Department (NMED) and the Region VI office on 19 Jul and 16 Aug 99, respectively. The documents are being reviewed at this time by NMED.
3. The drainage project referred to in previous quarterly reports is approximately 95% complete. The drainage system constructed will allow sufficient drainage of stormwater runoff that typically accumulates just outside the northern boundaries of the former lagoons. Photos will accompany the next quarterly report showing the completed drainage system. The photos will also show the progression of revegetation at the site.
4. Finally, the final report for the Jan 99 LTM groundwater sampling event will be finalized this quarter. Samples were analyzed for organochlorine pesticides and metals. Sample results were well below established alternate concentration levels for each analyte. The report recommends that LTM activities cease and final closure approval be obtained by the NMED.
5. Documentation of the above is available upon request from the 49 CES/CEV office at Holloman AFB. If you have any questions or comments, contact Jose Gallegos or Court Fesmire at (505) 475-5395.
