**RE: APPROVAL OF THE PHASE II RCRA FACILITY INVESTIGATION
WORKPLAN FOR SWMU 141, HOLLOMAN AIR FORCE BASE
EPA ID# NM6572124422
HWB-HAFB-03-002**

Dear Mr. Moffitt:

The New Mexico Environment Department (NMED) has reviewed Holloman Air Force Base's Phase II RCRA Facility Investigation Work Plan for SWMU 141 dated August 2003.

NMED approves the implementation of the work plan with the following conditions:

1. Section 1.2, page 1-1 - There is a conflict between the 2 DPT soil borings and 2 ground water samples stated in this section and the number of DPT soil borings and ground water samples outlined in Section 4 of the work plan. NMED requires that the sampling be performed as outlined in Section 4.
2. Section 4.1, page 4-1 states that a representative sediment sample will be collected from the drainage gallery. NMED requires that this sample be collected from the bottom of the drainage gallery, as this would most likely represent sediment that was deposited at the time of operation of the unit.

Howard Moffitt
