RE: Groundwater sampling results for closure of Base Sewage Lagoons and Golf Course Main Pond

Dear Colonel Norris:

On October 27, 1992, the Hazardous and Radioactive Materials Bureau (HRMB) approved a proposal to resample wells KAFB0610 and KAFB0502 and send the samples for analysis at two laboratories in an effort to ascertain the source of 2 Butanone found during the May 1992 round of groundwater sampling. Per your letter of February 9, 1993, HRMB was informed that, due to your difficulty in finding a second lab, Mr. David Morgan would split samples with Kirtland AFB under the DSMOA program. HRMB is in receipt of the sampling and analysis results from the DSMOA lab, Analytical Technologies, Inc., and is forwarding them for your review.

If there are any questions regarding this matter, please contact Ms. Stephanie Stoddard of my staff at (505) 827-4308.

Sincerely,

Barbara Hoditschek
Program Manager, RCRA Permits
Hazardous and Radioactive Materials Bureau
