Ms. Nancy Morlock, Environmental Engineer
RCRA Permits Branch
U.S. EPA Region 6
1445 Ross Ave, Ste 1200
Dallas TX 75202-7233

Dear Ms. Morlock

In October 1994, we notified you of a potential SWMU, DP-69, Ammo Storage Area Disposal Site. In November 1994, you directed us to add this site to Appendix VI of our RCRA Part B Permit; we did this via a Class I permit modification.

After further consideration and review of the test results submitted in October, we believe it would better serve environmental interests to combine this SWMU with the adjacent SWMU 6-1, Landfill 1. This would move this potentially contaminated, high-relative-risk site from Appendix VI to Appendix I, and would accelerate restoration activities. Additionally, this site appears to actually be one of the older areas of Landfill 1 that was not covered with subsequent fill. We plan to conduct a geophysical survey and deep soil borings at this site as part of the Stage 2A, Phase II RFI activities in FY95.

If you concur with this approach, please advise us immediately so we may issue a Class I permit modification.

Sincerely

CHRISTOPHER B. DeWITT, R.P.G
Chief, Restoration Branch
Environmental Management Division
