Re: KAFB Request for Pumping Information Related Albuquerque Bernalillo County Water Utility Authority (Water Authority) Well Fields

Dear Mr. Bitner:

This letter was prepared in response to your electronic communication dated May 28, 2010 regarding specific pumping rate information for all Water Authority production wells has been received. In addition, you requested a preference for monthly averaged pumping rates by well from year 2000 through whatever year represents the most recently compiled statistics.

As you may be aware, your consultant for the KAFB Bulk Fuels Spill Project, CH2M Hill, has been provided monthly run-time information for all City of Albuquerque and, subsequently, Water Authority production wells on an annual basis since 2000. The information transferred from the Water Authority to CH2M Hill was intended for application in performance of an existing contract between the Water Authority and CH2M Hill to update the New Mexico Office of the State Engineer model for water rights information.

This letter grants permission to Mr. Greg Gates, the CH2M Hill Project Manager, for the existing contract between the Water Authority and CH2M Hill to provide you with monthly run-time information for the Water Authority production wells for calendar years 2000 through 2009. A copy of this letter is being provided to Mr. Gates as well. It is our expectation that Mr. Gates will inform the Water Authority at such time at the information transfer is complete.
