**RE: Stage 2 Abatement Plan Monitoring Program Addendum, Bulk Fuels Facility (ST-106), Kirtland Air Force Base, Albuquerque, New Mexico.**

Dear Mr. Holmes:

The New Mexico Environment Department (NMED) has reviewed a Stage 2 Abatement Plan (AP) monitoring program addendum proposal, dated December 4, 2006, for the installation of monitoring well KAFB 1065 at the Bulk Fuels Facility (ST-106) on Kirtland Air Force Base (KAFB). The Stage 2 AP monitoring program addendum proposal is hereby approved pursuant to the New Mexico Water Quality Control Commission (WQCC) Regulations Section 20.6.2.4109 NMAC.

Approval of this Stage 2 AP monitoring program addendum does not change the conditions of the original Stage 2 Abatement Plan approval, nor does it relieve KAFB of its responsibility to obtain third-party access, and to comply with any other applicable federal, state and/or local laws and regulations, such as zoning requirements and nuisance ordinances.

NMED thanks you for your progress on this important clean-up and appreciates past meetings and site visits. If you have any questions, please contact Baird Swanson, Project Manager, at (505) 222-9520 or Christine Bynum, Program Manager, at (505) 827-2754.

Sincerely,

William C. Olson, Chief  
Ground Water Quality Bureau
