**Subject:** RE: Request for ST-106 30-day reporting extension

Baird

Thanks for your voicemail response, it sounds like you presented the information concerning our extension requests in the two previous workplan addendums to Alex as it occurred and as we discussed.

I will have to discuss the required formal request for an extension of time with Wayne to determine our response, as this needs to be addressed by our management.

We are moving forward with our management's approval of the workplan addendum to install the groundwater monitor well to determine the downgradient extent of the dissolved phase plume. As agreed, the well location is proposed on California Ave, between Gibson and Eastern.

Thanks

**Subject:** Request for ST-106 30-day reporting extension

Mark and Wayne,

I passed the KAFB request for ST-106 monitoring reporting extension as requested in the previous work plan to Alex Puglisi and Bill Olson at Mark Holmes request. The NMED management response was to have KAFB submit the monitoring plan modification request separately as soon as possible. This is not to be confused with the required work plan still due 11/30/09.

Please submit the written monitoring reporting change request to NMED for review and approval.

Thank you,

Baird Swanson
