RE: Response to Notice of Intent to Discharge; Discharge Permit Not Required for Kirtland Air Force Base, KAFB-106050 Equipment Decontamination and Well Development Water, AI: 2404

Dear Mr. Holmes:

The New Mexico Environment Department (NMED) received a Notice of Intent on June 13, 2011 to discharge approximately 745 gallons of non-hazardous drilling equipment decontamination and well development water associated with the Bulk Fuels Facility Solid Waste Management Units ST-106 and SS-111. The notice satisfies the requirements of Subsection A of 20.6.2.1201 NMAC of the New Mexico Water Quality Control Commission (WQCC) Regulations (20.6.2 NMAC). The proposed discharge is located in Section 36, Township 10 North, Range 3 East, Bulk Fuels Facility, Kirtland Air Force Base, Bernalillo County.

Based on the information (including analytical data) provided in your Notice of Intent, NMED has determined that a Discharge Permit is not required as long as the discharge is as described. A Discharge Permit is not required at this time pursuant to Subsection A of 20.6.2.3105 NMAC because the information provided indicates that the discharge will not adversely affect ground water quality.

The proposed discharge is briefly described as follows:

Approximately 745 gallons of non-hazardous water generated by decontamination of drilling equipment and development of ground water monitoring well KAFB-106050 will be discharged to the ground surface at the Bulk Fuels Facility site. The water will be discharged at the site in a

page 2

controlled manner, containing the water in the immediate area of the site and avoiding runoff into storm sewers or arroyos. The depth to ground water is approximately 500 feet.

Although a Discharge Permit is not being required for this discharge at this time, you are not relieved of liability should your operation result in actual pollution of surface or ground waters. Further, this decision by NMED does not relieve you of your responsibility to comply with any other applicable federal, state, and/or local laws and regulations, such as zoning requirements, plumbing codes and nuisance ordinances.

If at some time in the future you intend to change the amount, character or location of your discharge, or if observation or monitoring shows that the discharge is not as described in your Notice of Intent, you must file a revised Notice of Intent with the Ground Water Quality Bureau.

If you have any questions, please contact George Schuman, Program Manager of the Ground Water Pollution Prevention Section, at (505) 827-2945.

Sincerely,

William C. Olson, Chief
Ground Water Quality Bureau
