Dear Mr. Romero

Water to be discharged will be generated as a result of maintenance of injection well KAFB-7 that is not impacted by site contamination. This submittal is provided in response to the December 5, 2019 request from the New Mexico Environment Department Ground Water Quality Bureau (NMED-GWQB) regarding planned KAFB-7 disinfection maintenance. The attached Notice of Intent is associated with operation and maintenance of the Class V Underground Injection Control well KAFB-7 under permit DP-1839. Please review and provide a response that will allow Kirtland AFB to complete the maintenance activities.
