Kirtland AFB NM 87117

Kevin Pierard
Hazardous Waste Bureau
New Mexico Environment Department
2905 Rodeo Park Drive East, Building 1
Santa Fe, New Mexico 87505-6303

Dear Mr. Pierard:

In a letter dated November 9, 2020, the New Mexico Environment Department (NMED) provided an approval with modifications to the Interim Measures (IM) Work Plan for site ST-070E, Oil Water Separator. This approval directed the Air Force to install three additional soil vapor monitoring wells at the site, with a due date to submit a soil vapor monitoring well work plan by April 30, 2021. The Air Force is currently working a contracting action to develop the work plan and install additional soil vapor monitoring wells at the site, but to date this contracting action is still underway.

NMED has also recently approved a groundwater monitoring well work plan for this site and those groundwater monitoring wells are tentatively scheduled for installation in June of 2021. Kirtland AFB would like to use the lithological and geophysical data obtained from installation of those groundwater monitoring wells to inform development of the soil vapor monitoring well work plan.

Based on availability of funds and the desire to use the newly obtained data from groundwater well installation, Kirtland AFB is respectfully requesting a 180-day extension to October 31, 2021 to deliver the ST-070E Oil-Water Separator Soil Vapor Monitoring Well Installation Work Plan.

If you have any questions or concerns, please contact Mr. Darren Knight at 661-203-7714 or email John.Knight.15@us.af.mil, or Mr. Scott Clark at 505-385-3679 or scott.clark@us.af.mil

Sincerely

DAVID S. MILLER, Colonel, USAF
Commander
