Dr. Allyn M. Davis, Director
Hazardous Waste Management Division
U. S. Environmental Protection Agency
1445 Ross Avenue
Dallas, TX 75202-2733

Dear Dr. Davis:

On July 19, 1993, Hazel O'Leary, the Secretary of Energy, approved with no changes the draft Federal Facility Compliance Agreement (Agreement) dated June 25, 1993, regarding Land Disposal Restriction requirements at the Los Alamos National Laboratory. Secretary O'Leary authorized the Department of Energy (DOE), Los Alamos Area Office, to release the Agreement for public comment subject to concurrence by the Environmental Protection Agency (EPA), Region 6.

As required by Section II of the Agreement, DOE must provide the public with an opportunity to review the Agreement and submit comments to EPA, Region 6, for your consideration. Enclosed are a strategy, draft advertisement and a cover sheet prepared by DOE. These documents contain the information which describe how the requirements of Section II are going to be met. An earlier draft of the plans for public comment was reviewed by Dr. Joel Dougherty of your staff.

As stated above, no changes to the Agreement were requested during our internal review. If no changes to the public comment plan are requested by Region 6, then DOE will issue the notifications and release the June 25, 1993 document for review. Your prompt review is requested as we would like to start the 30-day review period on July 30, 1993.

If you have any questions, please call me at (505) 667-5105, or Jon Mack of my staff at (505) 665-5026.

Sincerely,

Jerry L. Bellows
Area Manager
